

# Dr. Allen Davidoff of XORTX Therapeutics' on developing therapies for kidney diseases and uplisting to the NASDAQ

written by InvestorNews | December 9, 2021

In a recent InvestorIntel interview, Chris Thompson spoke with Dr. Allen Davidoff, CEO of [XORTX Therapeutics Inc.](#) (NASDAQ: XRTX | TSXV: XRTX | FSE: ANU) about XORTX's recent capital raise of over US\$13.4 million as part of its uplisting to the NASDAQ and its deployment of funds as it plans several clinical trials for the next year.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Allen Davidoff explained that XORTX is a biotech pharma company focusing on developing therapies for kidney diseases including a treatment for kidney issues related to COVID-19. He went on to explain how XORTX has been focusing on progressive kidney diseases, an area where there are very few therapeutic options, and a "great opportunity" to develop drugs to satisfy this market. Dr. Davidoff mentioned that to reduce the business risk, XORTX focused on a drug that had already received a FDA "approvable letter" in the past, knowing that the safety and effectiveness of the drug is well defined, and then improved on the drug with "novel innovative formulations". Finally, he said that as a biotech pharma company with two late-stage therapies entering into Phase 3 trials, there is a potential to sign co-development deals with a large pharma company that could benefit both parties.

# Chris Thompson on eResearch's Update Equity Research Report on XORTX Therapeutics Inc.

written by InvestorNews | December 9, 2021

In a recent InvestorIntel interview, Tracy Weslosky spoke with Chris Thompson, President of [eResearch Corp.](#) about his 25-page [Update Equity Research Report](#) on [XORTX Therapeutics Inc.](#) (CSE: XRX | NASDAQ: XRTX | FSE: ANU).

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Chris Thompson said that XORTX is a biotech pharma company, which is taking an existing drug, Oxypurinol, and repurposing it to develop two, unique, proprietary therapies, which could help

to solve medical needs related to elevated uric acid and its effects on the kidneys without incurring the high cost of basic research. Using its optimization technology, XORTX is developing multiple drug treatments for acute kidney injury including the type of kidney injury found in COVID-19 patients. With two drugs in stage 3 clinical trials, Chris told InvestorIntel that XORTX is “significantly undervalued” when compared to its peer companies.
