

# Kirill Klip on TNR Gold's shotgun gold project in Alaska

written by InvestorNews | March 21, 2019

Recently during [PDAC 2019](#), Kirill Klip, President and CEO of [TNR Gold Corp.](#) (TSXV: TNR), shared update on TNR Gold's Shotgun Gold Project in Alaska with InvestorIntel's Peter Clausi.

Kirill said: "We developed inferred resource of just under 800,000 ounces of gold. The cutoff grade is 0.5 grams per ton, but we are very excited because we have intersections as good as over 20 meters over 2.5 grams per ton. The most exciting of course are intersections over 200 meters over 1 gram per ton. So we are talking about very big, potentially porphyry system very similar in geological signature to Donlin Gold."

TNR Gold Corp. is working to become the green energy metals royalty company. Over the past twenty-three years, TNR, through its lead generator business model, has been successful in generating high-quality exploration projects around the globe. With the Company's expertise, resources and industry network, it identified the potential of the Los Azules copper project in Argentina and now holds a 0.36% NSR royalty on the entire project, which is being developed by McEwen Mining Inc.

# Kirill Klip on TNR's copper and lithium royalties and gold project in Alaska

written by InvestorNews | March 21, 2019

InvestorIntel Corp. Senior Editor, Peter Clausi, interviewed Kirill Klip, President and CEO of [TNR Gold Corp.](#) (TSXV: TNR), in PDAC 2019 held in Toronto, Canada. In the interview Kirill talked about TNR's copper and lithium royalties and gold project in Alaska. He adds that he is positioning TNR to benefit from the green energy revolution. Kirill informed InvestorIntel about their strategic initiatives which have helped TNR strengthen balance sheet.

# International Lithium's Kirill Klip on the future of electric cars

written by InvestorNews | March 21, 2019

March 14, 2018 – “Because I am not talking about 2% of electric cars being sold worldwide, and we are just closing on that number only now, I am not talking about 5% or 10%. I am in this business because I know all cars will be electric.” says Kirill Klip, CEO, President and Chairman of [International Lithium Corp.](#) (TSXV: ILC), in an interview with InvestorIntel's Jeff Wareham.

**Jeff Wareham:** Kirill, lithium has been all over the media in the last little bit, all kinds of bullish sentiment and then we had the report last week. What are your thoughts on the most recent report that claimed that the lithium market was oversupplied for hundreds of years to come?

**Kirill Klip:** Thank you Jeff. Thank you for having me today. As you know, I am quite active in my social sphere with my blog and everything. I called this SQM lithium oversupply scare 2.0 because I still remember 1.0. I still remember when we all gathered in Las Vegas. It was the second lithium supply and demand conference. Three big boys at the time, one was SQM, they were talking, we can supply lithium for 1,000 years. Now, as you know, the first shot across the ball was made in January with the report of one Australian bank, I will not go in a lot of details here, when they scared all the market again, now SQM has a new license and maybe they can produce 216,000 tons of lithium carbonate equivalent, LCE. To put things into perspective UBS

now estimates that annual demand for lithium will be over 1 million tons for lithium, LCE, after 2026. Then we can move, of course, to the Morgan Stanley report which basically just picked up the same story one month ago. Now they scared all the market with additional supply, which still has to materialize, of just over 200,000 tons or maybe in total half a million tons of lithium.

**Jeff Wareham:** Alright Kirill. Thank you for clearing that up a little bit. It is great to get some color on it. How does that impact International Lithium?

**Kirill Klip:** As all junior mining companies, we had a very healthy correction. I will call it like this because in the investment world the entry point is everything because we always remember the very famous sentence, which is very difficult to implement in real life. Buy low, sell high. Now a lot of investors who really would like to study this market, they have a great opportunity to enter this market at a much better level. I can tell you why I am not personally scared, why I have just invested again in International Lithium in the latest round of our financing. Because I am not talking about 2% of electric cars being sold worldwide, and we are just closing on that number only now, I am not talking about 5% or 10%. I am in this business because I know all cars will be electric. I can talk forever. You will stop me at the right moment. Because now, just a few days ago, the high court in Germany allowed German cities to ban, I call them, die-sel cars. I call them die-sel, not diesel because we are dying because of them. Now who in their right mind will buying any die-sel car because you will never be able to sell it. All cars will be electric much faster than a lot of people will be anticipating it. I am investing in my big picture when we will have to produce, wait for it, 100 million tons of lithium by 2050...to access the complete interview, [click here](#)

# TNR Gold's Klip says all cars will go electric much sooner than anticipated

written by InvestorNews | March 21, 2019

March 14, 2018 – “I am really in this game because I believe that all cars will be electric much sooner than a lot of people are anticipating. It means that we will have to produce, moving from today's level of just 217,000 tons of lithium carbonate as a market total in sales to 1 million tons annually,” states Kirill Klip, CEO and President of [TNR Gold Corp.](#) (TSXV: TNR), in an interview with InvestorIntel's Jeff Wareham.

**Jeff Wareham:** Kirill is the executive chair of TNR Gold. Now the name confused me, Kirill, because to be honest with you as much as I like gold I love what you are trying to do. Can you tell me what TNR is up to?

**Kirill Klip:** Thank you very much Jeff for having me today. We are building on a base of TNR Gold, the green energy metals royalty company. Our roots go far back. The company is more than 20 years old. I joined it 10 years ago. One of our most exciting projects, in the gold now, will be in Alaska, Shotgun Gold; right close in proximity of Donlin Gold. Now, as we know, Alaska is heating up, if I may, for mining again. My real dream is to build the green energy metals royalty company. I still remember

the days when I was buying Royal Gold, if you remember. I was lucky enough to buy it below \$5. Then, of course, I was very happy to sell it over \$70. I would like to do the same, but now in the space of so-called energy metals.

**Jeff Wareham:** Okay. What energy metals excite you?

**Kirill Klip:** Energy metals excite me because I really think that we are at the very beginning of the megatrend and very famous now in our still small circles is the Morgan Stanley report, which almost halves the valuation of all lithium mining companies. Just telling me we are at the very, very beginning of this megatrend because at the moment we just crossed 1% in sales of our general so-called internal combustion engine, so-called ice cars being taken over by electric cars. Now they are closing on 2%. As we discussed just recently in my interview about International Lithium, I am really in this game because I believe that all cars will be electric much sooner than a lot of people are anticipating. It means that we will have to produce, moving from today's level of just 217,000 tons of lithium carbonate as a market total in sales, to 1 million tons annually. It is not my focus, but by UBS. Then I will give you my focus. We have to produce in total 12 million tons of lithium by 2030 just to have 200 million electric cars worldwide, and then up to 36 million tons...to access the complete interview, [click here](#)

# Klip on how to be an online media influencer in the resource sector

written by InvestorNews | March 21, 2019

March 14, 2018 – “Once you say something or you write a tweet you are responsible for that knowledge if you are sharing it, or for the action which you are thinking will be for the best benefit of shareholders of your own company,” states Kirill Klip in an interview with InvestorIntel’s Jeff Wareham.

**Jeff Wareham:** Kirill is really the number one online media influencer I think in this space today. Kirill you are all over social media. Our industry should probably give you a big thank you. What drove you to get so involved?

**Kirill Klip:** Thank you very much for this praise. It is a lot of very hard work. When I started my blog it was very interesting. What I found, of course, English is not my native language. But what was very interesting was, before you can write even a very short article, you have to really study the subject. Twitter is great in the sense that it disciplines your mind because you are communicating with very short messages, so you have to know your subject. You have to be there frequently, otherwise people will not be following you and you have to be interesting, otherwise people will get bored. I love this way of communicating, of explaining this education. It is very easy, but very hard when your investors can always hit you back and ask you questions about the company.

**Jeff Wareham:** You certainly are out there and accountable for what you have to say, are you not?

**Kirill Klip:** Exactly. You know what I found? Maybe the first time, 10 years ago, and then it became crystalized for me 5 years ago, why a lot of mining executives or executives are shy of this kind of public stance on a lot of things. Now I know because once you say something or you write a tweet you are responsible for that knowledge if you are sharing it, or for the actions which you are thinking will be for the best benefit of shareholders of your own company. Then shareholders or others can show you the tweet. Kirill you were talking about this, where is it? It is very, very interesting, this fear, when you have an almost immediate response from your core investors or participants in our industry.

**Jeff Wareham:** I have been on Twitter a long time, but LinkedIn not so long. I am amazed on how much information you get out on LinkedIn.

**Kirill Klip:** You know what is very interesting? Sometimes I do not know 100% about a particular subject. For example, I am quite good about lithium, lithium batteries, electric cars. But, for example, I do not have a clue how many electric buses are sold in China. I can just fly one question out and I will receive, like, 10 top experts tweeting me back. Then I can check the source, and within half an hour I know the best knowledge maybe from another person all across the world. It is fascinating how social media really opens us in the sense, that we can not only educate other people with our knowledge, but also we can gain and crystalize the knowledge in the industry very fast...to access the complete interview, [click here](#).
