

Red Light Holland rides the wave of growth in the relatively new psychedelics industry

The psychedelics industry is just starting to grow now from a small base and looks quite likely to follow in the footsteps of the cannabis industry's recent success story. Data Bridge Market Research forecasts that the global psychedelics market will grow from **USD 2.077B in 2019 to USD 6.859B by 2027**. Looking at these numbers that's a 3.3 times increase in just 7 years. Growing acceptance of psychedelic drugs for treating depression and mental disorders are key factors for the forecast growth.

Psychedelics are the class of hallucinogenic drugs that may be used recreationally or for medical purposes. Their main benefits are in enhancing the sensory perception, elevating mood, and promoting spiritual experiences. Psychedelic drugs can be used in a medical setting to help depression, psychological treatments, palliative care and as an aid to help control the mind to be calm and peaceful.

Psychedelics are legal in the Netherlands, where there are an estimated 100 Smart Shops operating, generating over US\$100 million in sales annually. The price for 10 grams of truffles (the maximum amount for a beginner) is between 10 to 15 Euros in Amsterdam. Just recently Canada approved 17 healthcare professionals to possess and use the psychedelic active ingredient psilocybin to conduct professional training in psilocybin therapy. The focus is mainly for patients dealing with end-of-life distress, but marks the first step towards legal medicinal psychedelics use in Canada.

Red Light Holland Corp. (CSE: TRIP) is a leader in this market and is well advanced to benefit from the forecast very strong growth. They recently began selling their premium 'magic truffles' products (psychedelics) in the Netherlands. The Netherlands has a long-standing, established legal magic truffles market. Red Light Holland is currently setting up to further grow, distribute and market a premium brand of magic truffles to the legal recreational market within the Netherlands. They are also focusing on the medicinal side of the psychedelics industry as well as expanding their global sales to legal destinations.

Red Light Holland's business plan is to produce and sell recreational and medical grade truffle products (psychedelics) in legal markets starting in the Netherlands

OUR CORE BUSINESS

			
EU-GMP Facility	Whole Fungi Medicine	Netherlands Based	Premium Brand
Red Light Holland is starting to build out its potential EU-GMP facility which aims to pioneer and lead EU-GMP in the naturally occurring PSILOCYBIN category with the strictest legal compliance measures.	Scarlette Lillie Science and Innovation plans on initiating and partnering with medical professionals to help further study the health benefits of 'whole fungi' medicine.	Strategically based in the Netherlands, Red Light Holland will provide a premium brand Truffle to the current Dutch market.	Red Light Holland plans to produce, distribute and market a premium health and wellness brand truffle to the highest standard.

Source: Company website

Red Light Holland has recently raised over C\$20M, providing the Company with over C\$30M in the bank, this includes the latest C\$11.6M bought deal financing. The funds intend to be used for working capital and general corporate purposes, essentially to grow the business. Red Light Holland has already grown and pre-sold their first batch of magic truffles from their production facility in Horst, Netherlands. They are now growing a further 1,000,000 grams of magic truffles. CEO

Todd Shapiro stated: “Red Light Holland is ecstatic to announce that we have started to grow our second batch of magic truffles, expected to be 10X the original batch’s size.”

Global and product expansion potential for Red Light Holland

On February 25, 2021, Red Light Holland announced: “iMicrodose pack receives authorization for the first legal import and sale of psilocybin truffles to Brazil....for prescribed medical patient use.” The iMicrodose pack contains 15g of psilocybin truffles made by Red Light Holland. This marks a significant milestone for Red Light Holland with their “first prescribed by a physician for medical use” of their truffles product, as well as an advancement in opening up the legal and medically approved market for psilocybin in Brazil.

On December 30, 2020, Red Light Holland announced they intend to make a groundbreaking investment in the St. Vincent and the Grenadines’ plant-based wellness and psychedelics industry, via a purchase of 100% of Mera Life Sciences LLC (‘Mera’). St. Vincent and the Grenadines are islands in the Caribbean Sea. Mera is developing a modern medicinal industry in St Vincent and the Grenadines with their issued psychedelic licenses. Todd Shapiro, CEO and Director of Red Light Holland, stated: “The acquisition of Mera and its coveted licenses would allow Red Light Holland to perform high quality psychedelic product research and development, cultivate, extract and process, and export, not just Psilocybin, but with compounds such as Ayahuasca, MDMA, DMT, Peyote, Ketamine and many other natural based plants as well....”

On December 20, 2020, Red Light Holland announced it has entered into a non-binding letter of intent to acquire 51% of Psychedelic Insights in Amsterdam, the Netherlands. Psychedelic Insights currently provides psychedelic assistance to clients from all over the world, who are in need and want to try a safe and psychological guided experience. This includes psychedelic palliative care, re-connecting veterans

and global mental health screening. A condition in the agreement includes an exclusive supply agreement with Red Light Holland's truffles, grown from Red Light Holland's facility in Horst, Netherlands.

Closing remarks

Red Light Holland continues to ride a wave of success with their magic truffles psychedelics. A 10x increase in their truffle production following the first batch being 100% pre-sold in advance, an overseas expansion potential via 100% acquisition with Mera, a potential 51% Psychedelic Insights acquisition (global client base), and finally, some initial success selling into Brazil. Added to all this it appears the medicinal use of psychedelics is making progress in Canada.

It certainly looks like Red Light Holland will continue to rapidly grow, especially after their successful capital raises and now C\$30M in the bank. Red Light Holland's market cap has dramatically increased as a result of all this good news and now sits at C\$134M. Exciting times ahead, both for the Company and the industry.

Can Psychedelics Follow Cannabis' Lead?

Greenlight for Red Light Holland as Distribution Agreements Grow

Red Light Holland Corp. (CSE: TRIP) ("RLH") engages in the production, growth, and sale of a premium brand of magic/hallucinogenic truffles to the recreational market in

the Netherlands.

The Company is pre-revenue, with lots of potential, as it builds out a custom, 3000 square foot growing facility in Horst, the Netherlands.

To generate some immediate revenue and build its brand, the Company procured 10,000 units of psychedelic truffles for resale and started selling its Microdosing Packs of magic truffles in September through existing Smart Shop operators and its e-commerce platform. Its Microdosing Pack contains a small amount of magic truffle promoting responsible use, with the drug benefits but without the intensity of a full psychoactive experience.

Distributions Deals

In September, RLH signed a distribution agreement for its Microdosing Packs with Super Smart's location in Tiel, the Netherlands.

Then in October, the Company reached a distribution arrangement with Smartshop Oss, in Oss, the Netherlands.

Finally, RLH completed a distribution arrangement with 3 House of Smart locations in the Netherlands, located in the cities of Rotterdam, Eindhoven and Den Bosch.

Todd Shapiro, CEO of RLH, commented, "clearly we are excited for a broad and diverse adult demographic, within all of these beautiful areas, to soon have the opportunity to see our brand and potentially purchase our responsible-use product."

Psychedelics Industry

The psychedelics industry is similar to where the cannabis industry was 10 years ago as it fights for legalization in various countries. The use of psychedelic products is currently illegal in most jurisdictions, however countries such as the Netherlands and Jamaica have legalized some forms

of psychedelics.

Psilocybin is the chemical alkaloid that induces psychedelic effects, often found in psilocybin mushrooms (“magic mushrooms”) or psilocybin truffles (“magic truffles”).

RLH is currently growing 3 different strains of magic truffles: *Psilocybe Mexicana*, *Psilocybe Galindoi*, and *Psilocybe Tampanensis*, and expects to have an initial batch of 100,000 grams of magic truffles available this quarter.

Retail establishments in the Netherlands that specializes in the sale of psychoactive substances, such as magic truffles, are called Smart Shops. There are an estimated 100 Smart Shops operating in the Netherlands, generating over US\$100 million in sales annually.

New Clinical Market

The psychedelics industry has since gained some traction with pharmaceutical companies starting to research the effects of psychedelics on a range of medical ailments from mental health to cancer.

In September, RLH announced that its science division, Scarlette Lillie Science and Innovation, entered into a relationship with Jinfiniti Precision Medicine in order to explore the potential roles that psilocybin and magic truffles can play for age-related and psychiatric disorders.

Jinfiniti has created a blood test that can detect key factors that drive aging and other genetic instabilities. Jinfiniti’s fast and low cost test allows for scientists from both companies to clearly evaluate the potential for psilocybin treatments that go beyond what is currently being explored.

The relationship with Jinfiniti opens up a whole new clinical market that goes beyond the recreational market.

High Profile Management Team

RLH has several prominent management executives and celebrities to help drive its growth and brand recognition, including: Ann Barnes, co-founder of Peace Naturals; Bruce Linton, founder and former CEO of Canopy Growth; Tony Clement, the former Health Minister of Canada (2006-2008); and, Russell Peters, a comedian with international brand recognition and over 5.5 million people on his social media platforms.

Funded for Growth

The Company had \$6.6 million in cash as of June 30, 2020, after raising over \$4 million in private placement in June.

RLH is currently trading at \$0.08 with a market cap of only \$17.2 million has plenty of room for upside gains.
