

Charles Desjardins on using map technology to expand copper and zinc claims

Charles Desjardins, President, CEO and Director of Pistol Bay Mining Inc. (TSXV: PST) ("Pistol Bay") in an interview with InvestorIntel Senior Editor, Peter Clausi discuss Pistol Bay's Confederation Lake property. The property has a historic "very rich volcanic massive sulfide (VMS) deposit", made up of mostly copper and zinc. Pistol Bay has been using map survey technology, which can "detect sulphide zones at depths of 300 meters or more", to further explore Confederation Lake. Charles states that through the use of the map survey technology, Pistol Bay is now reporting being able to see depths of 700 meters and have claimed several new copper, zinc, silver and gold deposits...for more information, [click here](#)
