

Moovly Media's chart moves in mysterious ways

written by InvestorNews | October 12, 2022

Is the recent move seen in Moovly Media's chart trying to tell us something?

Sometimes a chart can tell you things that fundamentals may not. Although it can also be a bit like reading tea leaves – not exactly an accurate science and possibly complete rubbish. You never know until after the fact, and by then you've either missed the boat or perhaps you've had your head handed to you depending on how committed you were to your convictions. Nevertheless, we are going to have a look at a chart with some unusual recent activity in the absence of any official news (I don't surf the chatrooms, so it's possible someone is trying to turn this into a meme stock of sorts) and speculate what may or may not be going on.

The chart we are going to have a look at today is [Moovly Media Inc.](#) (TSXV: MVY | OTCQB: MVVYF), the leading provider of creative cloud-based tools used to tell marketing, communications and training stories using videos and video presentations. With clients including users from over 300 of the Fortune 500, small businesses, freelancers and Ivy league universities, Moovly is an intuitive, cost-effective choice for DIY creation of engaging video-based content.

The background for what we are about to review is that Moovly has been light on corporate press releases. Today [it had news](#) announcing the "Moovly E-Commerce Video Maker", an addition to its suite specifically aimed at online sellers. Previously it issued a [press release on Aug 4, 2022](#) (which wasn't super significant in my opinion), and the latest financial information

released by the Company was Aug 29 when they issued their quarterly results for the period ending June 30, 2022. This is why the activity over the last seven trading days (since September 30) have attracted my attention. It appears there is nothing obvious in the public domain to explain the previous five day double in the stock price.

Source: StockCharts.com

Three things jump out at me when looking at this chart. First, as noted, the stock doubled over a span of 5 days, although perhaps that isn't so unusual given it happened previously at the beginning of June. However, the June move corresponded with [news](#) that could be construed as significant and beneficial for Moovly's stock – the signing of a Global Partnership Agreement with Bayer AG, the German multinational pharmaceutical and life sciences company and one of the largest pharmaceutical companies in the world. The latest move happened in the complete absence of any corporate press releases or updates.

Second is the volume of the most recent rally. Unlike the move in June that corresponded with a press release, October 4 saw over 3 million shares traded, more than 4x the volume traded the day of the Bayer AG news. This is also 22x the average daily volume traded for Moovly, which is a huge deviation from the norm. Albeit the absolute dollar value of the trade isn't huge in the context of the overall market (approx. C\$330K), it's still a pretty big bet being placed by someone, or several someones.

Third is the stock move relative to what was happening in the general market over the same period. You may have heard the expression, "a rising tide lifts all boats". However, in this situation, the S&P 500 was setting new 1 year lows (at the time)

on September 29 and 30, which is when the Moovly rally appears to have begun. The macro market saw a bit of a 'dead cat bounce' on Monday (Oct 3) and Tuesday (Oct 4), which I'm sure benefitted the rise in Moovly's share price on those days, but then the S&P 500 resumed its downward travels culminating in a fresh new 52 week low yesterday. On the flip side, Moovly continued to gain strength all the way until yesterday when it finally got a little oversold in the short term (see the RSI indicator at the top of the chart) and had its first down day in 14 trading days, and on very small (below average) volume.

What does this all mean? I can't say for certain. All I know is that there is some unusual (technically quite bullish) activity that is seemingly inexplicable by anything that I can see in the public domain. Is it random or is something going on? Today's press release of a niche addition to their software suite was not particularly highly anticipated or market-moving news, shown by the fact that the market didn't react to it. What I do know is, based on the last quarterly results, Moovly Media is probably getting close to running low of working capital, unless revenue has increased dramatically or debt lines have been increased. Either of those could be perceived as positive developments, potentially explaining the recent stock price move. In the meantime, we watch and wait for what happens next for this C\$21 million market cap media company.

eResearch's Chris Thompson on Moovly Media and growing market demand for Videos

written by InvestorNews | October 12, 2022

In a recent InvestorIntel interview, Tracy Weslosky speaks with Chris Thompson, President of [eResearch Corp.](#) about his 18-page Update Report on [Moovly Media Inc.](#) (TSXV: MVY).

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Chris stressed the growing demand for videos and how Moovly allows users to create customized videos easily to reach the widest possible target audience. In the interview, Chris highlighted Moovly's initiatives to enhance their cloud-based media technology with new features, functionality, and integration with other platforms from larger players in the media space. He explained how integration with the likes of Mailchimp, Microsoft Excel, HubSpot, and many more enables Moovly to go after large corporate and enterprise clients which represents the largest revenue opportunity.

Eyes on Moovly

written by InvestorNews | October 12, 2022

The efficient-market hypothesis in financial economics states that asset prices reflect all available information. This implies that it is impossible to “beat the market” consistently on a risk-adjusted basis since market prices should only react to new information. While this may hold some truth on a macro level, many people (including me) believe if you do your homework on less popular, less liquid stocks you can find some hidden gems out there. Now don’t jump to the conclusion that I’m about to serve up the hottest stock tip of the year. It’s the stock market after all, I could be right and wrong at the same time about the same stock given that if there aren’t enough buyers out there, an equity likely won’t go up in price regardless of underlying fundamentals or new information.

Today is more of an examination of the price action of a specific equity and its relative performance over the last six months given the information that has come available over that time and whether or not that seems to make sense. The stock under the microscope is [Moovly Media Inc.](#) (TSXV: MVY), the leading provider of creative cloud-based tools to create compelling marketing, communications and training videos and video presentations. Their clients including users from over 300 of the Fortune 500, small businesses, freelancers and Ivy League universities. Moovly is an intuitive, cost-effective choice for DIY creation of engaging video-based content. It’s a pretty cool technology company but today’s focus isn’t as much about what they do but what happens after they announce something.

Looking back six months ago to January 29th of this year, Moovly’s share price closed the day at \$0.315. News that [paid Education subscriptions grew more than 300%](#) year over year on

February 9th helped push the stock up to a high of \$0.455 that day with momentum carrying through until the next news release on February 17th where it rallied to an intraday high of \$1.02 on the heels of news that they had signed a [reseller partnership agreement with VidiBuzz](#) to accelerate its sales in the US. Makes sense, two pieces of new information for the market that were taken positively given revenue should be up considerably and the partnership essentially expanded the company salesforce and accessibility to new customer sets. Both news items were impactful in their own right and arguably should put the company in a better place than it was at the end of January. Perhaps a triple of the stock price might have been a little overdone so it wouldn't be unusual to see the stock settle back into a more reasonable trading range.

And that's exactly what happened as the stock traded in a range of \$0.60 to \$0.80 through to the end of March. During that stretch of time, the company released its quarterly results for the period ending December 31, 2020, plus integrations of its software with [Wistia](#), [Microsoft](#), [Twitter](#) and [Instagram](#). All of which the market appeared to view with passive indifference even though one can argue the quarterlies confirmed the Company was moving in the right direction and all the integrations further expanded the ability to seamlessly access a larger user base. As well, the Company raised \$3.8 million at \$0.45 which could potentially cause a bit of selling pressure on the stock but provided capital to fund sales and marketing growth.

However, April Fool's Day proved to be no laughing matter for the share price of Moovly as the stock began a steady journey lower moving from \$0.61 to a low of \$0.155 by June 17th. But here's where the story gets interesting to me. On May 5th The Company announced it had [upgraded its platform](#) to support multiple languages, improving translation efficiency and overcoming multilingual challenges. I view this as a step-change

in making Moovly's video software available to a much broader, global audience. But what do I know? The stock price was down 8% the day of this news. On June 23rd another [reseller and partnership agreement](#) was signed with UAE based SFA Dubai. At least that news rallied the stock a material 35% but only back to \$0.25 and was relatively short lived. Then July 7th one of Moovly's partners, Contenthouse announced it had [secured Dipl. Ing. Fust AG's content creation contract](#) using the Moovly platform. This dragged the stock price back up to a high of \$0.28 but again only briefly.

Despite all this information, it's true that the overall market can also have an impact on an equity as well. It's tough for an individual stock to have a prolonged rally in a bearish environment. However, if we look at the TSX Composite over this same time frame we see a February 18th close of 18,274 versus 20,230 yesterday, or a 9.7% gain over that period. Arguably a stock simply holding its own should at least be flat to positive over that time in light of the underlying market.

So I will now leave it up to you to decide if the market is correct now about Moovly at yesterday's close of \$0.21 (down 33% since Jan 29th), was it right in February or March or perhaps somewhere in between. Regardless, in my opinion, somewhere along the way the market stopped acting efficiently with this stock. I suspect the next quarterly results will help us all decide what the right answer is.

Brendon Grunewald on the Moovly HubSpot integration and the value of outbound video messaging for sales and marketing

written by InvestorNews | October 12, 2022

In a recent InvestorIntel interview, Tracy Weslosky speaks with Brendon Grunewald, CEO and Director of [Moovly Media Inc.](#) (TSXV: MVY), about their recent [announcement](#) that Moovly has built an integration to HubSpot and how they are being featured in a collection of media apps.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Brendon went on to say that their [integration with HubSpot](#) addresses the growing demand for using Moovly's multimedia creation platform for outbound video messaging for sales and marketing. Brendon further explained how the partnership with ARichGlobe will allow Moovly to accelerate growth internationally. With a long list of satisfied customers and consistently winning deals, Brendon reinforces his commitment to the user with "Moovly provides a platform to create large volume of videos that are appealing and affordable."

Brendon Grunewald on rising demand for Moovly's cloud-based video tools and the partnerships driving sales forward

written by InvestorNews | October 12, 2022

In a recent InvestorIntel interview with host Peter Clausi, Brendon Grunewald CEO and Director of [Moovly Media Inc.](#) (TSXV: MVY) discuss Moovly's recent [financing](#) and how they are fueling

growth and meeting the demand for their creative cloud-based video tools through marketing and sales partnership deals.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Brendon went on to say that Moovly has integrated with several third-party platforms like Mailchimp, Instagram, Twitter, and Microsoft AI. Having recently announced that their cloud-based tools are now multilingual, Brendon sums it up simply with: “The more integrated we are the more value our platform has.”

Peter Clausi of InvestorIntel Interviews Chris Thompson of eResearch on Initiating Coverage of Moovly Media Inc.

written by InvestorNews | October 12, 2022

Moovly has struck a chord with large enterprise customers seeking to integrate a feature-rich video creation system into existing platforms

Toronto, April 23, 2021 – Peter Clausi with InvestorIntel.com, a leading online source of investor information, interviews Chris Thompson, President of [eResearch Corp.](https://eResearchCorp.com), the independent source of equity research, about his latest analyst report on [Moovly Media Inc.](https://MoovlyMediaInc.com) (TSXV: MVY).

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Peter has Chris discussing his price target for Moovly, the catalysts behind the stock's continued growth and why he thinks you should consider becoming a shareholder. Chris evaluates the company using revenue projections and a discounted cash flow with Moovly's focus on larger Enterprise Customers and its steady stream of partnership news to validate his position.

Chris starts when Peter asks why the stock has performed so well

this last quarter, “the product itself has grown; it’s got now 3.7 million users who are using the Application. It also has got some great partnerships and I think that just the momentum of those announcements and those deals have helped investors become more aware of the company – it must be driving revenue upwards as well.”

He adds: “They do have a good e-commerce base that’s out there growing steadily month on month, but they had a bit of a boost with the COVID stay at home (audience) where people wanted to make videos. Moovly focuses on (offering) a feature-rich platform for video creation and so it really sort of keyed in for people staying at home and wanting to create videos from home. “

“But I think more and more it’s the enterprise customers who are coming in who are using some of their features like their API to integrate into their own products – as they also have an automation tool that allows you to customize videos very quickly... those types of features have really sort of struck a chord with the larger enterprise clients who are looking for a partner on the video creation platform.”

Moovly continues moving forward with cloud-based video technology

written by InvestorNews | October 12, 2022

By now [Moovly Media Inc.](#) (TSXV: MVY) ('Moovly') should be no stranger to readers of InvestorIntel. Matthew Bohlsen first wrote about Moovly back in [November 2019](#) when the stock was trading at C\$0.05. Closing yesterday at C\$0.67 would have been a pretty good ride but the story doesn't appear to be over any time soon. The good news is that Moovly is continuing to make progress on growing its business with further integrations with new software partners.

On March 3rd, the company announced it had successfully integrated with [Wistia](#), a leader in the video marketing software space. Then on March 11th, the Company press released [another deal](#) launching two new integrations into the suite of Microsoft products – Microsoft AI (featuring Neural Text To Speech) as well as Microsoft's OneDrive (cloud storage).

I'm sure most people are familiar with Microsoft and what it brings to the table, so focusing on the Wistia deal, CEO Brendon Grunewald [said](#), "Moovly has recently focused on integrations to optimize our business, reduce costs and leverage our technology in order to add value to our clients, and our business as a whole. Moovly's users can easily create and publish captivating

videos along with the marketing tools and analytics that help any company grow and succeed.”

Imagine all the companies that have recently found tools like Shopify, allowing them to survive the Covid pandemic, now being able to make a quality, low-cost video (commercial) to sell their product and drive more traffic to their new e-commerce platform(s).

This intuitive, easy to make video can then be posted to any number of social media outlets and even translated or captioned to almost any language on the planet utilizing the many innovative tools that Moovly can provide. Companies big and small can all benefit from this technology but keep in mind that users from over 300 of the Fortune 500 are already existing Moovly clients.

Another major market for the company is the education technology space where last month the company announced a [302% increase in paid subscribers](#). Moovly recently added a Zoom-style collaboration and communication tool which has proven to be a key element of the growth in the education sector.

Clients can use this communication tool in conjunction with their existing Moovly subscription, thereby dispensing with the need for a second, separate service. Again, ease of use is at the core of Moovly’s success at expanding its business lines with approximately 3.7 million total registered users now accessing its platform.

It’s encouraging to see that Moovly is advancing the business but still being mindful of the bottom line. The company recently [announced](#) its second capital raise of 2021 (approx. C\$3.8M) in order to fund its future growth and remove any financial stress from interfering with the company’s focus.

Based on recent cash burn rates, this should give the company ample breathing room to continue to increase paid subscribers and transition to growth from internally generated cash flow or perhaps even look at an acquisition. We continue to watch this stock with interest.

Brendon Grunewald on Moovly Media's 300% YOY growth in education subscriptions for video tools

written by InvestorNews | October 12, 2022

In a recent InvestorIntel interview, Peter Clausi speaks with Brendon Grunewald, Co-Founder and CEO of [Moovly Media Inc.](#) (TSXV: MVY) about Moovly's recent [news release](#), citing their 300% year-over-year (YOY) growth in education subscriptions, and an update of approximately 3.7 million total registered users on its platform.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Brendon went on to explain how the substantial increase in home/remote offices due to COVID-19 created an equally impressive demand for Moovly's video media platform.

Touching on their competitive video tools which allows them to stand out from their competition, Brendon highlights their strategy for accelerating sales with small-to-medium businesses.

He also explained the value of their partnerships and how this strategy has increased interest in Moovly overall.

To learn more about their recent capital raise, and to watch the full interview, [click here](#)

Moovly Media stock is up 1,125% over the past year and it is potentially only just getting started

written by InvestorNews | October 12, 2022

I first [wrote on Moovly Media Inc.](#) (TSXV: MVY | OTC: MVVYF) ('Moovly') for InvestorIntel back on November 4, 2019 when the stock was trading at around C\$0.05. Since then a lot has happened right for Moovly, **including a 1,125% stock price gain** over the past year, rising from C\$0.04 to C\$0.49. **That is a 12.25x gain in just 1 year. Wow!**

We did give readers some warning when, in May 2020, I wrote: [Moovly Media 'wows' with massive user growth during the COVID-19 lockdown](#). I quoted at the time: "One company that is benefiting from the online video boom is Moovly Media Inc.."

Today I look back on the past year for Moovly and what investors can look forward to in the year ahead.

[Source](#)

Moovly Media's past year

Moovly had a great past year for so many reasons, here's some:

- COVID-19 encouraged work from home and boosted online video creation. This has been a great tailwind for Moovly. We saw this with Alphabet Google's latest Q4 results yesterday where [profits rose 43%](#) to \$15.2 billion, on the

back of booming revenue from YouTube.

- On Feb. 2, 2021 Moovly [announced](#) that due to demand from an increasingly international client base they had expanded their AI-enabled Text-to-Speech Feature, now available in 100+ languages.
- On Nov. 19, 2020 Moovly [announced](#) integration of Amazon Transcribe and Google Translation's AI systems into Moovly's video creation platform. This means Moovly users can **with a simple mouse click, convert voice content to subtitle text and can automatically translate their videos into 109 languages**. Now that's impressive tech!
- On Oct. 22, 2020 Moovly [announced](#) that their users could now, very easily, convert powerpoint slides into a new video creation. Moovly [stated](#): "The wizard-based process imports all elements from their slide deck and lets the user choose presets such as music and animations. Once imported, users can further fine tune and enhance their content, add voice and animations, and save it as an attractive video or an online video presentation."

The above is just a brief summary of some of the great innovations and improvements that Moovly has been making. All of this has resulted in Moovly now having [over 3.6 million users](#) in hundreds of countries. This includes [more than 300](#) of the Fortune 500 companies, as well as many government agencies.

Looking ahead to 2021 for Moovly

Moovly intends to add more client driven features to their video creation platform. This also helps expand Moovly's market place as was the case with translation opening up the global market and PowerPoint to video opening up the education sector, just to name a few.

Moovly also expect to bring on more clients from the business enterprise and education segments during 2021. This will

potentially help boost revenues as these are typically lucrative sectors.

With work from home not going away anytime soon the boom in video content creation should continue for the foreseeable future. The demand for video content and hence creation is huge. This means that in the case of Moovly Media 3.6 million users is potentially just the start.

Video is the future, the future is now

Oberlo marketing statistics [state](#): “It’s estimated that by 2022, **82 percent** of the global internet traffic will come from video streaming and downloads (Cisco, 2019)... [54%](#) of consumers want to see more video content from a brand or business they support... [87%](#) of marketing professionals use video as a marketing tool (Wyzowl, 2019).”

Closing remarks

Moovly has had a great past year due to a great macro tailwind from increased video content creation in the wake of COVID-19 and because Moovly has continued to improve their video creation platform, now used by over 3.6 million users in hundreds of countries.

Moovly has a market cap of C\$68.5M (~US\$53M), which still pales in significance when comparing to companies like Zoom Communications on a market cap of US\$111B.

Looking ahead to 2021 it looks highly likely that Moovly will continue to become better known and more widely used, thereby increasing both their user base and over time their revenues.

Watch this stock closely in 2021.
