

Exploits Discovery's Jeff Swinoga on Securing Competitive Assets in the Newfoundland Gold Region

written by InvestorNews | March 11, 2024

In an engaging interview at PDAC 2024 with Tracy Weslosky of InvestorNews, Jeff Swinoga, the President, CEO, and Director of [Exploits Discovery Corp.](#) (CSE: NFLD | OTCQX: NFLDF), shares insights into the company's strategic positioning and future prospects in the Newfoundland gold sector. Swinoga emphasizes the value of their holdings, stating, "We've got a very strategic claim called Bullseye, and in the last year, there's been 5 gold discoveries just South of our Bullseye property." This remark underscores the significant potential of their assets in a region that's rapidly becoming a hotspot for gold exploration. With a dedicated local team in Gander, NL, Exploits is well-placed to capitalize on the burgeoning gold exploration scene.

The focus of Exploits Discovery Corp.'s exploration strategies and geological interests are crucial to its ambitions, particularly along the Appleton Fault Zone. By following a path similar to industry pioneers, the company's exploration efforts at the Bullseye and the larger Gazebo properties are poised to potentially redefine its prospects. Swinoga detailed the competitive edge and determination that led Exploits to secure these prime locations, showcasing the company's resourcefulness and strategic planning in the high-stakes domain of mineral exploration.

Recent developments at the company, especially the promising

results from the expanded till sampling program at the Gazeebow South property, highlight the potential for significant gold mineralization along the Appleton Fault Zone. This advancement solidifies the northward extension of gold zones, contributing to an optimistic outlook for Exploits Discovery Corp. With upcoming assay results from the Bullseye property and the plan for further exploration, Exploits is strategically positioned to explore the geological riches of its claims, marking a potential trajectory for its future in Newfoundland's gold exploration landscape.

About Exploits Discovery Corp.

Exploits is a Canadian mineral exploration company focused on the acquisition and development of mineral projects in Newfoundland and Labrador, Canada. The Company is focused on discovering high-grade structurally hosted epizonal gold similar to New Found Gold's success along the Appleton Fault zone and parallel structures within the Exploits Subzone.

Exploits is utilizing its experienced, talented local team and geologic understanding with the vision to become one of the most successful explorers in Canada.

VP EX Paul Teniere of TRU Highlights Recent High-Grade Gold Results and New Copper Discovery

written by InvestorNews | March 11, 2024

In this InvestorIntel interview, Chris Thompson talks to [TRU Precious Metals Corp.](#)'s (TSXV: TRU | OTCQB: TRUIF) VP Exploration Paul Teniere about TRU's recent high-grade gold assay results (including 57.6 g/t gold over 2.5 metres and 34 g/t gold over 2 metres) from their Golden Rose Project in Central Newfoundland. Providing an update from channel sampling at their newly discovered Northcott Gold Zone on the Golden Rose Project, Paul explains what makes the zone a significant gold discovery for TRU.

Speaking about TRU's key exploration accomplishments in 2022, Paul discusses the geographic and geologic importance of their Golden Rose Project's location between two large gold deposits (Marathon Gold's Valentine Gold Project and Matador Mining's Cape Ray Gold Project). He goes on to provide an update on TRU's recently closed [private placement](#) the proceeds of which will be used to explore for critical minerals at the Jacob's Pond target

area on the Golden Rose Project.

About TRU Precious Metals Corp.

TRU (TSXV: TRU) (OTCQB: TRUIF) is on a mission to build long-term shareholder value, through prudent natural resource property development and transactions. TRU is exploring for gold and copper in the highly prospective Central Newfoundland Gold Belt on its 100%-owned Golden Rose Project, originally optioned from TSX-listed Altius Minerals. Golden Rose is a regional-scale 236 km² land package, including a recently discovered 20 km district-scale structure, and an additional 45 km of strike length along the deposit-bearing Cape Ray – Valentine Lake Shear Zone, directly between Marathon Gold's Valentine Gold Project and Matador Mining's Cape Ray Gold Project. In addition, TRU has an option to acquire up to an aggregate 65% ownership interest in two claim packages covering 33.25 km² including a 12 km strike length along the Shear Zone within Golden Rose.

TRU is a portfolio company of Resurgent Capital Corp. ("Resurgent"), a merchant bank providing venture capital markets advisory services and proprietary financing. Resurgent works with promising public and pre-public micro-capitalization companies listing on Canadian stock exchanges.

Newfoundland is the place to be for Leocor Gold's Shawn Ryan

written by InvestorNews | March 11, 2024

Gold prices have historically risen in response to macroeconomic trends such as inflationary pressure and market uncertainty. As we head into another period of unprecedented economic upheaval, gold is once again emerging as a shining star in the investment universe.

One Canadian company focused on exploring and leveraging the largely unexplored region of Newfoundland, Canada, is [Leocor Gold Inc.](#) (CSE: LECR | OTCQB: LECRF). [Newfoundland](#) has a long history of mining operations, and has attracted considerable recent interest and exploration capital by a large number of gold and mineral companies.

Under CEO and Director Alex Klenman, Leocor has put together a team with the experience and expertise to explore and capitalize upon this opportunity. Leocor's Technical Advisor Shawn Ryan is a renowned prospector who has been able to utilize his prospector skills to find valuable gold deposits. A New York Times profile went so far as to describe Ryan as "the king of a new Yukon Gold rush" before he turned his attention to the prolific Newfoundland region.

Leocor is focused on a handful of projects in the Newfoundland region, including the Western Exploit District. The company's three contiguous projects represent a 144,000 hectare land

package in the heart of Newfoundland. Ryan introduced Leocor to this project, and his data and analysis suggest this project has the potential for new gold discoveries at scale.

Property location map. Source: company website

[On July 27, 2022,](#) Leocor announced the results of a 2021 exploration program in the Western Exploit District project known as the Hodges Hill property. Their team performed soil sampling, LiDAR surveys, and airborne magnetic-VLF surveys. The results of this exploration program identified 12 potential gold targets at the Hodges Hill property. The exploration program reported soil samples that ranged from trace to 1018.5 ppb Au, with 25 samples containing more than 50 ppb Au.

Additionally, the program also suggested the likelihood of a large body of pyroxene gabbro. This material has been associated with gold mineralization in the area. Research from the Geological Survey of Canada found that pyroxene gabbro was key to the development of the Marathon Gold's Valentine Lake deposits. The next step at this site is to perform follow-up work, such as geologic mapping, to identify high-priority targets for drill testing.

In addition to the Hodges Hill property, Leocor also [announced](#) in June that it had mobilized drilling at their Baie Verte project located in northwest Newfoundland. The company had previously announced the results of 2021 exploration activities, which identified a 7-kilometer northeast trending zone of anomalous gold in the soil and a 4-kilometer subparallel trend of anomalous copper in the soil.

Along this zone, the company identified multiple targets. These results were better than what was anticipated with this project.

In particular, there is structurally controlled gold mineralization that bears similarities to the nearby Pine Cover Mine. This news led to the start of a rotary air blast (RAB) drilling program.

This program will test at least six target areas for gold and/or copper mineralization. The company plans to drill between 25 to 30 RAB holes. If the results of the program are promising, then Leocor plans to follow up with additional diamond drilling. No results have been reported yet.

The past few years have seen a new Newfoundland gold rush, with many new discoveries and companies now on the way to production. Leocor's Technical Advisor Shawn Ryan has shown a nose for discoveries. While it is early days for Leocor, Newfoundland is definitely the place to be, and with inflation or other market forces exerting upward pressure on long-term gold, discoveries can help bring explorers to the attention of investors.

Joel Freudman talks about TRU Precious Metals' key location and coming gold and copper drill results

written by InvestorNews | March 11, 2024

In this InvestorIntel interview, host Tracy Weslosky talks to [TRU Precious Metals Corp.](#)'s (TSXV: TRU | OTCQB: TRUIF) Co-Founder, CEO & Director Joel Freudman about upcoming drill

results and the key strategic location of its Newfoundland Golden Rose Project.

“The key value driver for us,” Joel says, “is our Golden Rose Project in central Newfoundland. We’re right between two gold deposits – five million ounce Marathon Gold on one side, and they’re putting their mine into production in 2025, and the other side is Matador Mining with a significant gold resource. We control all the land between them.” This consolidation came about as a result of a recently announced option agreement that added the remaining smaller properties to TRU’s land package, which, he tells Tracy, “makes it a great turnkey project for potential acquirers down the road.”

Joel also tells Tracy that results from the summer 2000 meter drill program at the Jacobs Pond area of the Golden Rose Project are expected shortly, where the company “saw a lot of indications at surface for copper even bits of cobalt.” He believes that finding copper at Jacob’s Pond could be a good potential catalyst for TRU, diversifying its appeal and meriting a follow-on drill program.

Joel Freudman talks about gold and copper advances at TRU Precious Metals' Golden Rose Project

written by InvestorNews | March 11, 2024

In this InvestorIntel interview with host Byron W. King, [TRU Precious Metals Corp.](#)'s (TSXV: TRU | OTCQB: TRUIF) Co-Founder, CEO & Director Joel Freudman provides [an update](#) on the drill program at TRU's Golden Rose Project in Central Newfoundland.

In the interview, which may also be viewed on the InvestorIntel YouTube channel ([click here to subscribe](#)), Joel Freudman talks about their Golden Rose Project's strategic location in Newfoundland, situated between two major gold deposits. With Eric Sprott and TSX listed Altius Minerals as the largest shareholders, Joel discusses TRU's new [IP survey results](#) and gold zone modelling from the Golden Rose Project which showed strong indications for copper in addition to gold.
