

Peter Clausi on how CBLT has used creative M&As in gold and battery metals to make money for their shareholders

written by InvestorNews | November 30, 2020

In a recent InvestorIntel interview, Tracy Weslosky asks Peter Clausi, President, CEO and Director of [CBLT Inc.](#) (TSXV: CBLT) to explain what he meant by his line that “a mining company can make more money with a pen than with a drill bit.” He responds on how this works with market cycles and then adds that as a result of their focus on strategic M&A activities that “CBLT has not had to do financing since 2016.” He then goes on to explain how CBLT has found creative M&As to make money for their shareholders.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Peter went on to say, “Two years ago, CBLT bought a portfolio of assets for little over \$1 million in stock. Northshore gold was one of the assets in the portfolio which was sold for \$1.45 million.” He also provided an update on the Big Duck Lake gold property on which Peter said “...is analogous to the Moose Lake Porphyry which hosts the Hemlo Gold Camp.” Commenting on the cobalt market Peter said, “If you believe that we are going to greenify the world, if you believe that there is a run on Lithium – then you have to believe that there is a run on cobalt.”

CBLT offers investors early stage exposure to a very large number of cobalt and precious metals projects in Canada

written by InvestorNews | November 30, 2020

One of the biggest trends in 2020 is the US moving to secure supply of [critical materials](#) such as the battery materials, including the hardest of all to source, cobalt. Combine this with the benefits of safe haven assets such as silver and gold, and you get a perfect combination of safety and growth. One Canadian company has built a large portfolio of Canadian located assets with a focus on cobalt as well as precious metals such as gold, silver, nickel, copper, and PGMs. Even better the Company is still trading at a fraction of its future potential value, assuming it succeeds in the long run.

That company is CBLT Inc. (TSXV: CBLT).

[CBLT Inc.](#) is a project generator with a focus on quality cobalt projects, ideally associated with valuable by-products such as base (Ni, Cu) or precious metals (Au, Ag, PGMs), in safe jurisdictions such as Canada. The Company prioritizes shareholders interests by minimizing stock dilution by bringing in cash from M&A deal flow and JV deals. CBLT is a believer in building up new ethical sources of cobalt that will be in high demand as the [EV boom](#) accelerates in future years. The Company prefers projects with poly-metallic potential or at least cobalt and some precious metals.

CBLT Inc.'s has numerous projects and JVs in Canada.

CBLT's [Copper Prince Project](#) is their flagship project located within Falconbridge Township, in the [Sudbury Mining District](#) of Ontario, Canada. The Property is comprised of sixteen contiguous patented mining claims totaling 256 ha and has Cu-Ni-PGM and gold occurrences. Sample [616311](#) found 54.3g/t Au and 5,020 ppm (0.502%) Co. Other grab samples included sample [616313](#) that returned 12.8 g/t Au, 0.47% Co, and sample 616318 that returned 4.31 g/t Au, 0.44% Co.

CBLT's [Chilton Cobalt Project](#) is in the Grenville Subprovince in Quebec and contains two areas with large nickel-copper-cobalt-chromium findings. CBLT is currently in the permitting process for excavation and a maiden drill program.

CBLT Inc.'s projects

[Source](#)

In 2018 CBLT [sold the Bloom Lake Property](#) to Winmar Resources Ltd (ASX: WFE) in a deal that saw CBLT retain a 10% management fee, as well as 16 million shares in Winmar. Winmar's shares are currently [suspended](#) as they seek approval to buy half of a cobalt processing facility in the DRC. Bloom Lake assay [results](#) have confirmed high-grade copper-cobalt mineralization with anomalous gold and nickel. The most notable was Sample 853028, taken south of the No. 1 audit, which assayed 6.84% cobalt, 0.422 g/t gold, 0.58% copper and 1.56% nickel.

On June 1, 2020 CBLT Inc. [announced](#) that they have sold their 56% joint venture share in Northshore Gold for cash and equity to Omni Commerce Corp. The total consideration payable to CBLT in respect of the transaction is \$1,450,000 consisting of: Cash consideration of \$350,000 and stock consideration of \$1,100,000 payable by the issuance of post-consolidation common shares in Omni's capital on closing.

Closing remarks

There is little doubt that as the EV revolution accelerates the world will need more cobalt, especially from safe countries such as Canada.

Investing into CBLT Inc. gives investors exposure to a very large number of Canadian cobalt and other valuable metals (gold, silver, nickel, copper, PGMs) exploration projects, as well as equity exposure to several other explorers that have bought projects from CBLT, such as Winmar and Omni.

Due to management's focus to avoid stock dilution by successful deal flow, CBLT Inc. has a small share register of just 70.24 million shares outstanding. The current market cap is just C\$2.1 million. This means that investors that are willing to invest early and show some patience have the potential to be highly rewarded for taking the risk of an early stage smaller cap

mining stock. One to watch.
