

Fission 3.0's Dev Randhawa on the Uranium Boomlet

In a recent InvestorIntel interview, Peter Clausi spoke with Dev Randhawa, Chairman and CEO of Fission 3.0 Corp. (TSXV: FUU | OTCQB: FISOF) about the current upward trend in the uranium price and about Fission 3.0's portfolio of 18 highly prospective properties in Canada's prolific Athabasca Basin.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Randhawa highlighted the effect that the US administration's focus on uranium as a source of baseload electricity, without any carbon footprint, is having on the uranium market, and uranium's role in the electric vehicle revolution. In the interview, he also talked about the upside potential for investors in Fission 3.0's project discoveries and the team's success in two discoveries in the past. Randhawa also provided an update on the closing of Fission's recent private placement.

Thomas Smeenk with an update on the FDA Phase II clinical trial program of the Hemostemix blood-derived, stem cell therapeutics product (ACP-01)

In a recent InvestorIntel interview, Peter Clausi speaks with Thomas Smeenk, Co-Founder, President and CEO of Hemostemix Inc. (TSXV: HEM | OTC: HMTXF) about the Phase II Clinical Trial on Hemostemix's ACP-01 which has the potential to treat patients with severe critical limb ischemia.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Thomas went on to say that Hemostemix is in the process of completing the source document verification. With about 60% of source documents verified, Thomas said that they expect the source document verification to be complete within the year.

To watch the full interview, click here

About Hemostemix Inc.

Hemostemix is a publicly traded autologous stem cell therapy company. A winner of the World Economic Forum Technology Pioneer Award, the Company developed and is commercializing its lead product ACP-01 for the treatment of CLI, PAD, Angina, Ischemic Cardiomyopathy, Dilated Cardiomyopathy and other conditions of ischemia. ACP-01 has been used to treat over 500 patients, and it is the subject of a randomized, placebo-controlled, double blind trial of its safety and efficacy in

patients with advanced critical limb ischemia who have exhausted all other options to save their limb from amputation.

On October 21, 2019, the Company announced the results from its Phase II CLI trial abstract entitled “Autologous Stem Cell Treatment for CLI Patients with No Revascularization Options: An Update of the Hemostemix ACP-01 Trial With 4.5 Year Followup” which noted healing of ulcers and resolution of ischemic rest pain occurred in 83% of patients, with outcomes maintained for up to 4.5 years.

The Company owns 91 patents across five patent families titled: Regulating Stem Cells, In Vitro Techniques for use with Stem Cells, Production from Blood of Cells of Neural Lineage, and Automated Cell Therapy.

Dev Randhawa on Fission 3.0 and why ESG Investors are Looking at Uranium

In a recent InvestorIntel interview, Peter Clausi speaks with Dev Randhawa, Chairman and CEO of Fission 3.0 Corp. (TSXV: FUU | OTCQB: FISOF) about the rising market interest in uranium and exploring for uranium in Canada's Athabasca Basin, the world's leading source of high-grade uranium.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here](#) to subscribe to the InvestorIntel Channel), Dev went on to say how Fission 3.0 has been able to stake a portfolio of near-surface high-grade uranium assets in close proximity to other major uranium discoveries. Led by the team that founded Fission Uranium Corp. (TSX: FCU | OTCQX:

FCUUF) and made the Patterson Lake South (PLS) high-grade uranium discovery, Dev said that Fission 3.0 has significant insider ownership which aligns the management's interest with that of the shareholders. Dev also highlighted the uranium supply deficit and the rising interest in the sector. He added, "...it is the only energy that is carbon-free, has no footprint yet can provide baseload power."

Silver Bullet Mines' Peter Clausi on preparing to trade and the race to production

In a recent InvestorIntel interview, Tracy Weslosky speaks with Peter Clausi, VP Capital Markets of Silver Bullet Mines Inc. (TSXV: SBMI) about the near-term silver production potential at Silver Bullet Mines' high-grade silver deposits in Arizona, USA.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Peter went on to say that Silver Bullet Mines has a portfolio of five past-producing silver mines and has received conditional approval to list on the TSX Venture Exchange. With

a cashed-up treasury post successful oversubscribed financing and one of its projects expected to be in production in Q4 of this year, Peter said that Silver Bullet Mines may be able to put other projects in operation without having to go to the market for financing.

To watch the full interview, [click here](#)

About Silver Bullet Mines Inc.

Silver Bullet Mines Inc. is a silver and copper exploration and development company with projects in the western USA. Their flagship project is the Black Diamond, close to 5,000 acres in the Miami-Globe copper camp and centered on the Richmond Basin. The basin is the site of the original 1870s native silver discoveries that brought prospectors to the now significant Globe copper camp. The story goes that a scouting party was fired upon by Apache Indians using bullets made of hammered native silver. Thus inspiring the company name – Silver Bullet Mines. The Richmond Basin is the location of several historic high grade silver-copper mines including: McMorris, La Plata, Helena, Silver Sevens, Buckeye and numerous associated prospects. Little work or extraction came from this area since the early 20th century as the camp focused on big copper mines. But these mine anchor this section of what is called the Arizona Silver Belt that extends from the famous Silver King near Superior, AZ and parallels the trend of the major copper deposits including the Magma mine. They believe the high grade silver is still there waiting for discovery.

Marcy Kiesman on Durango’s

Discovery property in one of the most prolific gold camps in Quebec

In a recent InvestorIntel interview, Peter Clausi speaks with Marcy Kiesman, CEO and Chair of Durango Resources Inc. (TSXV: DGO | OTCQB: ATOXF) about the exploration program at Durango's wholly-owned Discovery property in one of the most prolific gold camps in Quebec.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Marcy went on to say that Durango has received the permits to drill at the Discovery property and follow up on previous 6.2 and 7.6 g/t gold surface grab samples. She also provided an update on Durango's Windfall Lake project located in Windfall Camp which is the most prolific gold exploration camp in Canada and is famous for high-grade gold projects.

Joel Freudman on TRU Precious

Metals' 5 gold exploration projects in the Newfoundland Gold Belt

In a recent InvestorIntel interview, Peter Clausi spoke with Joel Freudman, Co-Founder, President, and CEO of TRU Precious Metals Corp. (TSXV: TRU | OTCQB: TRUIF) about TRU's change of business to a mining issuer as they prepare to start trading this morning.

Further to an InvestorIntel story written by Dean Bristow on May 7th titled Will there be a rush to get this gold?, Joel explains the background on the TRU, including a major property transaction with Altius Minerals, which has now become a strategic investor in the company.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Joel went on to say that one of the competitive advantages of any junior mineral exploration company is the location of their properties. TRU's flagship Golden Rose Project is next door to the largest undeveloped gold resource in eastern Canada. "Great spot for finding more gold," he added. With a very experienced management team, Joel said that the Company is in a strong cash position to enhance growth after the recent oversubscribed financing.

To watch the full interview, click here

About TRU Precious Metals Corp.

TRU has assembled a portfolio of 5 gold exploration properties in the highly prospective Central Newfoundland Gold Belt. The Company has an option to purchase 100% of the Golden Rose Project, located along the deposit-bearing Cape Ray – Valentine Lake Shear Zone, from a subsidiary of TSX-listed

Altius Minerals Corporation. TRU also owns 100% of the Twilite Gold Project, located along the same Shear Zone, and 3 under-explored properties including its Rolling Pond Property (under option) bordering New Found Gold Corp.'s high-grade Queensway Project.
