

Dev Randhawa of Fission 3.0 talks about US reliance on Russian uranium

In this InvestorIntel interview during PDAC 2022, host Tracy Weslosky talks with Fission 3.0 Corp.'s (TSXV: FUU | OTCQB: FISOF) Chairman and CEO Dev Randhawa about its uranium projects in the Athabasca Basin and the search for a domestic supply.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), Dev says that the uranium “fundamentals are better than ever” he has seen in his 30-year career, with traditional skeptics such as the American Democrats and green energy advocates now embracing nuclear energy as a carbon-neutral fuel.

Making the case for securing a domestic supply of uranium in light of Russian uncertainties, Dev said that “you have to keep in mind in America every fifth household is literally fueled by uranium – without nuclear power they can’t turn the lights on. Every tenth household is powered by Russian uranium.”

Dev also talks about Fission 3.0's strengths as a North American uranium explorer, including a treasury with \$14 million in cash, strong management and project locations near other large uranium discoveries, including Arrow, Triple R and Hurricane.
