

Becoming the World's Leader in Producing Low Cost Green Solar Grade Silicon Metal

In a recent presentation at InvestorIntel's 6th Annual Technology Metals Summit, Bernard Tourillon, Chairman, CEO and President of HPQ Silicon Resources Inc. (TSXV: HPQ) delivered a presentation titled, "Becoming the World's Leader in Producing Low Cost Green Solar Grade Silicon Metal". Addressing industry and investors alike, Bernard highlights the green advantages of using the "disruptive" PUREVAP™ technology to create solar grade silicon metal. Being developed by industry leader, PyroGenesis, HPQ has acquired the intellectual property rights to the process and has exclusive use of it... to access the complete presentation, [click here](#)
