

Ucore's Strategic Leap: Pat Ryan Discusses the First Mover Advantage in Rare Earths Processing at Louisiana's Strategic Metals Complex

written by InvestorNews | December 18, 2023

In a recent InvestorNews interview with host Tracy Weslosky, Pat Ryan, Chairman and CEO of [Ucore Rare Metals Inc.](#) (TSXV: UCU | OTCQX: UURAF), shared insights into the company's latest strategic developments, particularly focusing on the Louisiana Strategic Metals Complex (LA-SMC) discussed in Ucore's most recent [news release](#). Central to Ucore's progress is the support from Louisiana Governor Jon Bel Edwards, who has played a pivotal role in advancing the LA-SMC project through the execution of a contract for exemption of ad valorem taxes. This move is part of a larger \$15 million incentive package from Louisiana Economic Development and is expected to yield an estimated \$8.2 million in tax savings over ten years, significantly aiding the project's progression.

The recent visit by Ucore's team to the Kingston, Ontario, RapidSX™ Demo Plant marks a key step in the transition process of replicating the plant's technology in Louisiana. This initiative is part of Ucore's broader strategy to establish a strong operational base in North America, positioning itself as a critical player in the rare earth processing industry.

Additionally, Ryan discussed the potential collaborations Ucore is exploring with both government support in [the US](#) and [Canada](#); along with various industries, emphasizing the company's focus

on strengthening the supply chain for metal alloy making and catering to sectors such as automotive, wind energy, and national defense.

Also in the interview, there was a discussion surrounding feature coverage of Ucore in a Reuters' [article](#) titled *Insight: Western start-ups seek to break China's grip on rare earths refining*, dated December 4, 2023, Ucore Rare Metals stands out for its innovative approach in the rare earths sector. Ucore aims to revolutionize rare earths processing by mid-2025 using RapidSX technology, which is touted to be thrice as fast as the traditional solvent extraction process, without generating hazardous chemical waste, and requiring significantly less physical space. Ucore's initiative is a part of a broader movement among Western companies to establish a non-Chinese supply chain for these critical minerals, essential for numerous electronic devices and the clean energy transition.

About Ucore Rare Metals Inc.

Ucore is focused on rare- and critical-metal resources, extraction, beneficiation, and separation technologies with the potential for production, growth, and scalability. Ucore's vision and plan is to become a leading advanced technology company, providing best-in-class metal separation products and services to the mining and mineral extraction industry.

Through strategic partnerships, this plan includes disrupting the People's Republic of China's control of the North American REE supply chain through the near-term development of a heavy

and light rare-earth processing facility in the U.S. State of Louisiana, subsequent Strategic Metal Complexes in Canada and Alaska and the longer-term development of Ucore's 100% controlled Bokan-Dotson Ridge Rare Heavy REE Project on Prince of Wales Island in Southeast Alaska, USA.
