

# Tom Meredith with Mario Drolet on Gold and West Red Lake Gold Mines

In a recent InvestorIntel interview, Mario Drolet speaks with Tom Meredith, Executive Chairman of West Red Lake Gold Mines Inc. (CSE: RLG | OTCQB: RLGMF) about the significant exploration potential of West Red Lake Gold's property in the Red Lake Gold District which hosts some of the richest gold deposits in the world.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mario started, "The best place to find a new mine is to look around past-producing mines." Tom went on to say that their 3100 hectares West Red Lake property hosts three former gold mines and is located 10km west of the famous Red Lake Mine Complex of Evolution Mining. Tom comments that on this property, the central positioned Rowan Mine "currently has a resource of 1.1 million ounces of 7.5 grams per ton between surface and about 500 meters deep. And over a length of about 1.2 kilometers, so – we have an exploration potential to make that bigger by going deeper, below 500 meters deep."

## About West Red Lake Gold Mines

West Red Lake Gold Mines is a Toronto-based minerals exploration company focused on gold exploration and development in the prolific Red Lake Gold District of Northwest Ontario, Canada. The Red Lake Gold District is host to some of the richest gold deposits in the world and has produced 30 million ounces of gold from high grade zones. The Company has assembled a significant property position totalling 3,100 hectares in west Red Lake (the "West Red Lake

Project”) which contains three former gold mines located 15 km west of the Red Lake mine complex. The Mount Jamie Mine and Red Summit Mine properties are 100% owned by the Company and the Rowan Mine property is held in a 66%/34% joint venture with Evolution Mining Limited. The West Red Lake Project property covers a 12 km strike length along the Pipestone Bay St Paul Deformation Zone and the Company plans to continue to explore the property both along strike and to depth during 2021.

## **West Red Lake Gold Mines' Tom Meredith on building a 'very valuable' gold property to mine**

In a recent InvestorIntel interview, Tracy Weslosky speaks with Tom Meredith, Executive Chairman of West Red Lake Gold Mines Inc. (CSE: RLG | OTCQB: RLGMF) about how one of the key strategies to developing a 'very valuable' property in the mining industry is to identify a key location with producing mills seeking more gold assets to maintain mill capacity at a cost effective rate.

Sounds simple, yes? In this interview Tom starts with an update on West Red Lake Gold Mines' most recent exploration work and highlight the competitive aspect of the surface gold deposits here. He starts the interview with: "We're working to make this property not only a bigger resource than the 1.1 million ounces that we have so far, but also to make it attractive to mine." West Red Lake Gold, which is located in the Red Lake Gold District host to some of the richest gold

deposits in the world, and has as Tom explains in this informative interview all of these compelling variables lining up for West Red Lake Gold shareholders.

## **West Red Lake Gold's Tom Meredith Provides Update on the Rowan Mine Property**

# Drilling Program

In a recent InvestorIntel interview, Tracy Weslosky spoke with Tom Meredith, Executive Chairman of West Red Lake Gold Mines Inc. (CSE: RLG | OTCQB: RLGMF) about their ongoing drilling at the West Red Lake Gold Project which has four gold deposits three of which are former producing mines. The project is in the Red Lake Gold District, one of Canada's most prolific mining districts.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Tom went on to say that their main historic mine is the Rowan Mine where the company has a million ounces of gold with grade of over 7.5 grams per ton. The Company is currently drilling a series of 16 shallow holes to target gold mineralization from surface down to the first level of the Rowan Mine. Tom highlighted that the West Red Lake Gold project has similar grades to some of the successful gold mines in the area. West Red Lake Gold Mines has a joint venture on the Rowan Mine property with Evolution Mining, a leading, growth-focused Australian gold miner.

## **Gold pioneer Thomas Meredith targets Red Lake for another touchdown?**

West Red Lake Gold Mines Inc. (CSE: RLG | OTCQB: RLGMF) ("RLG") has long sought to prove the existence of further high-grade deposits by targeting an area believed to hold compelling exploration potential.

The presence of intersecting structures provides a geological environment for the occurrence of significant gold zones. Recent drill results from this particular area demonstrated a grading of over 26 g/t, which continues to provide us with increased confidence in the overall zone. As such, it seems that sampling will continue into the new year and that Red Lake will continue to defend its reputation as one of the greatest gold producing regions this planet has to offer.

People have been pouring into Ontario's Red Lake area since gold was first observed there in 1925; within ten years, Howey Bay had the world's busiest airport, and yet even more prospectors continued to arrive by dog team and foot. To date, the Red Lake Mining District has produced over 22 million ounces of gold and ranks among the top 10 most desirable gold

jurisdictions in the world.

In 1995, the high-grade zone was first discovered and is the backbone of modern day Red Lake operations. Recent investments in infrastructure and development have positioned these renowned mines for many more years of long-term sustainable production.

The three historic mines on RLG's property sit along the east-west trending Pipestone Bay-St. Paul deformation zone, a regional structure that continues eastward off the property. A second gold bearing volcanic structure, the NT Zone, trends northeast on to the property and intersects with the Pipestone Bay-St Paul deformation zone approximately 1km east of the former Rowan Mine. Most of RLG's efforts to date have focused around the Rowan Mine, where drilling and historic data support an inferred resource of 1.1 million oz, within 4.5 million tonnes grading 7.57 g/t gold. The Mount Jamie Mine and the Red Summit Mine are owned 100% by RLG. The Rowan Mine is owned 60% by RLG and 40% by Goldcorp, a major funding partner with a long history at Red Lake.

Thomas Meredith is a successful entrepreneur and gold pioneer in the resource industry. He now heads up RLG after transforming his former company, VG Gold, in what is becoming a very similar story. He took the then broken VG with a \$3 million market capitalization, cleaned up the management and board, focused on advancing and de-risking the company's four historic mines in the Timmins gold camp, culminating in a resource base increase from 60,000 oz to 2 million oz. He oversaw the completion of two PEAs, a joint venture with Goldcorp, got permitting underway, and attracted Rob McEwen in as an investor, who took a 40% stake in VG through his company Lexam Exploration. By the time Lexam and VG merged eighteen months later, VG Gold had a market cap of \$200 million.

Meredith is clearly aiming to repeat his past successes at Red Lake and is relying on future drill results to prove him

correct. Crucially, there are producing mines only 20 km away and the area is already world-famous for its historic grades. Continuing to produce positive drill results could rapidly turn the site into an acquisition target; with 50.41 grams of gold per tonne over 1.50 metres and 22.72 grams of gold per tonne over 1.50 metres confirmed at the end of last year, the recent results may be enough to convince most investors of the project's merits.
