

Robert Vallis of Signature Resources on preparing the initial Lingman Lake Gold Project resource

written by InvestorNews | October 3, 2022

In this InvestorIntel interview, host Tracy Weslosky talks to [Signature Resources Ltd.](#)'s (TSXV: SGU | OTCQB: SGGTF) President, CEO, and Director Robert Vallis about the company's progress toward its initial NI 43-101 resource report for its Lingman Lake Gold Project, located in the prolific Red Lake district in Northwestern Ontario, Canada.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here to access InvestorChannel.com](#)), Robert tells Tracy that they have "worked very hard to put in place many of the key fundamental pillars for developing value in the company. We've established a modern exploration camp, we've advanced the data and the collection of data towards developing an initial 43-101 resource... Beyond that, it's unlocking the vast regional potential that we've secured in the control of an entire greenstone belt."

Robert also talks about the importance of a project's "DNA". Lingman Lake "checks pretty much every box," he says, "starting with the fact that it's in one of the best jurisdictions on the planet not only from past and current producing but also from geologic potential." He goes on to say "that massive land package that we control, which controls an entire greenstone belt and hosts our Flagship Lingman Lake Project, is the reason why we're doing this. It's in the backyard of an established

gold producing district, that being the Red Lake District where over 80 million ounces have been produced.” Even so, Robert continues, Signature Resources is working in an area that is relatively unexplored and sees the key to unlocking its value is “through the drill bit.”

Robert Vallis on the acceleration of an initial NI 43-101 Resource estimate of Signature Resources' Lingman Lake Gold Project

written by InvestorNews | October 3, 2022

In this recent InvestorIntel interview, Tracy Weslosky spoke with Robert Vallis, President, CEO, and Director of [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF) about Signature's transformational year in 2021. By combining old and new data including historic data compilation completed throughout the year, Robert provides an update on the [acceleration](#) of an initial NI 43-101 Resource estimate targeted for the end of Q2/2022.

Highlighting the impact of the strengthening of all aspects of the Board and Management, Robert provides an update on Signature's 100%-owned Lingman Lake Gold Project in Ontario, Canada. Commenting on Signature's extensive land position and a gold system at surface, to access the complete interview [click here](#).

Robert Vallis of Signature Resources speaks with Chris Thompson about High-Grade Gold Value Results

written by InvestorNews | October 3, 2022

In a recent InvestorIntel interview, Chris Thompson spoke with Robert Vallis, President, CEO, and Director of [Signature Resources Ltd.](https://www.signatureresources.com) (TSXV: SGU | OTCQB: SGGTF) about Signature's recent [drill results](#), which displayed significant high-grade gold values at its Lingman Lake Gold Project in the prolific Red Lake District in Ontario, Canada.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Robert Vallis said that the drill results indicate the potential for a much larger mineralized footprint at the Lingman Lake Gold

Project, and he explained how Signature has derisked the project and is well-positioned with its own drill rigs, crew, and supplies. He also said that the Lingman Lake Gold Project has a historical resource of over 234,000 oz of gold averaging 6.87 g/t and is a favorable location for finding additional large-scale high-grade gold deposition.

Robert Vallis on why a group of gold mine veterans have recently joined the Signature

Resources team

written by InvestorNews | October 3, 2022

In a recent InvestorIntel interview, Tracy Weslosky speaks with [gold mine veteran](#) Robert Vallis about joining the [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF) executive team. In addition to joining as the President, CEO and Director, Robert discusses the new addition of [Paolo Lostritto](#) as Chairman and [Dan Denbow](#) as the new Board and Management Advisor. Adding to the reasons for why he joined the Signature team, Robert discusses the competitive advantages of Signature's high-grade Lingman Lake Project and why he believe that it presents an excellent resource growth potential.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Robert went on to say, "It is the projects rare value potential that attracted me and specifically it is the people and the asset." He continued, "Signature has like minded, disciplined and highly motivated industry veterans. The project has rare qualities."

Speaking on the competitive advantages of the Lingman Lake Project, Robert said, "We have demonstrated (gold) ounce potential with a historic resource of nearly 234,000 ounces, it is high-grade with the right type of geology – a large package with nearly 30 kilometers in strike. The right address and a plethora of geological data."

About Signature Resources Ltd.

The Lingman Lake gold property consists of 622 staked claims, four free hold full patented claims and 14 mineral rights

patented claims totaling approximately 12,148 hectares. The property hosts an historical estimate of 234,684 oz of gold* (1,063,904 tonnes grading 6.86 g/t with 2.73 gpt cut-off) and includes what has historically been referred to as the Lingman Lake Gold Mine, an underground substructure consisting of a 126.5-meter shaft, and 3-levels at 46-meters, 84-meters and 122-meters depths.

*This historical resource estimate is based on prior data and reports obtained and prepared by previous operators, and information provided by governmental authorities. A Qualified Person has not done sufficient work to verify the classification of the mineral resource estimates in accordance with current CIM categories. The Company is not treating the historical estimate as a current NI 43-101 mineral resource estimate. Establishing a current mineral resource estimate on the Lingman Lake deposit will require further evaluation, which the Company and its consultants intend to complete in due course.

Shining a new light on the Lingman Lake Gold Project

written by InvestorNews | October 3, 2022

Deposit, location, management, and cash are four key factors when deciding to invest in an exploration company, and recent

moves by [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF) shine a new light on the Company.

Lingman Lake Gold Project

Signature already had a solid start with its Lingman Lake Gold Project. The property comprises the former producing Lingman Lake Gold Mine and two new early-stage exploration projects, Lingside West and Lingside East, that are believed to be extensions of the Lingman Mine deposit.

The Lingman Lake gold property is massive, consisting of approximately 12,148 hectares (over 30,000 acres), which is almost 23,000 football fields in size. The property cuts a 28-km-wide swath across the Lingman Lake Greenstone Belt, in northwestern Ontario, and Ontario continues to rank high as a safe jurisdiction for mining.

Greenstone belts often host economic mineral deposits and are well known for holding rich gold deposits. In Canada, one prolific example is the Abitibi Greenstone Belt, an area that spans eastern Ontario and western Quebec, and has produced over 100 mines and 170 million ounces of gold.

What Treasure does Lingman Lake hold?

Currently, the property hosts a historical resource estimate of over 234,000 ounces of gold (1.06 million tonnes grading 6.86 g/t Au). The old Lingman Lake Gold Mine has some existing infrastructure, including a 126.5-meter shaft and three working levels. The historical resource estimate is based on prior data and reports obtained and prepared by previous operators and is not a NI 43-101 compliant resource.

Earlier this year, the Company issued an updated NI 43-101 technical report as it progresses to a future resource model on

the project.

Adding to the Team

Former CEO Walter Hanych, who guided Signature for seven years, has shifted into the Head Geologist role and announced two [new executives](#) to propel the Company forward – Robert Vallis was appointed President, CEO, and Director, and Paolo Lostritto was appointed Chairman of the Board.

Robert Vallis is a 25-year veteran of the mining industry and most recently was Senior Vice President Corporate Development with [Golden Star Resources Ltd.](#) (NYSE American: GSS | TSX: GSC). Prior to that position, he was a Business Development executive at [Yamana Gold Inc.](#) (NYSE: AUY | TSX: YRI) for nearly nine years and worked on the \$3.9 billion acquisition of Osisko and the US\$395 million acquisition of Extorre Gold Mines Ltd.

Mr. Vallis commented, “I am very pleased and excited to have joined Signature Resources as President, CEO, and Director. The remarkable quality of the Company’s entire team and the high-grade Lingman Lake gold project present a significant opportunity to the Company and its shareholders with exceptional potential for rapid value growth.”

Paolo Lostritto has an extensive background in the Capital Markets, serving as President of Red Cloud Securities and previously he was a Senior Mining Analyst for over a decade at Octagon Capital, MGI Securities, Wellington West, and National Bank. He was “pounding the table” about Kirkland Lake Gold Ltd. (NYSE: KL | TSX: KL) as far back as 2010 and we all know how that story turned into a \$14.6 billion market cap behemoth.

Mr. Lostritto remarked, “I believe the company has an asset base that is underappreciated by the market, and now that the Provincial Government is building better road and power access

to the region, the story is ready to be told.”

Financings Strengthen Balance Sheet

To strengthen its balance sheet and fund exploration, the Company announced a non-brokered private placement to raise \$1 million and a share-for-debt transaction to convert almost \$300,000 of debt into 5.84 million shares.

Upward Pressure Continues to Build on Gold

Even with the recent COVID-19 vaccine announcements, the pandemic’s second wave continues to grow, forcing governments to implement new stay-at-home restrictions, severely denting the western economies. Public pressure on governments to pass new billion-dollar aid packages also raises inflation-related fears, helps to support the current gold price, and fuel speculation that it could go much higher.

Last week, two Goldman Sachs analysts wrote in a research report that gold prices should break out in 2021 as inflation worries increase demand and they forecasted gold could hit \$2,300 per ounce, implying a jump of more than 20%.

If you think it’s time to add some gold exploration exposure to your portfolio, Signature could be a stock to add to your watch list.
