## Greg Andrews on Search Minerals "Sprint to Production" with its rare earths deposits in Labrador

written by InvestorNews | February 22, 2022
In a recent InvestorIntel interview, Tracy Weslosky spoke with Greg Andrews, President, CEO, and Director of Search Minerals
Inc. (TSXV: SMY | OTCQB: SHCMF) about the commencement magnetic separation of bulk samples of Deep Fox and Foxtrot deposits at SGS Canada as Search Minerals "Sprint to Production" with its rare earths deposits in Labrador.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Greg Andrews highlighted the rising investor's interest in the rare earths sector and the dearth of operating rare earth deposits outside of China. With the prices for rare earths on the rise, he went on to explain why Search Minerals' updated 2022 PEA is expected to significantly improve the economics of its rare earths' deposits. Providing an update on Search Minerals' recent successful financing, Greg went on to explain why Search Minerals is "one of the most advanced rare earths companies in North America."

## About Search Minerals Inc.

Led by a proven management team and board of directors, Search is focused on finding and developing Critical Rare Earths Elements (CREE), Zirconium (Zr) and Hafnium (Hf) resources

within the emerging Port Hope Simpson — St. Lewis CREE District of South East Labrador. The Company controls a belt 63 km long and 2 km wide and is road accessible, on tidewater, and located within 3 local communities. Search has completed a preliminary economic assessment report for **FOXTROT**, and a resource estimate for **DEEP FOX**. Search is also working on three exploration prospects along the belt which include: **FOX MEADOW, SILVER FOX** and **AWESOME FOX**.

Search has continued to optimize our patented Direct Extraction Process technology with the support from the Department of Industry, Energy ad Technology, Government of Newfoundland and Labrador, and from the Atlantic Canada Opportunity Agency. We have completed two pilot plant operations and produced highly purified mixed rare earth carbonate concentrate and mixed REO concentrate for separation and refining. We also recognize the continued support by the Government of Newfoundland and Labrador for its Junior Exploration Program.
