

Not your typical blockchain mining company

February 21, 2018 – “As a company we have always been really interested in the intersection of the media industry with blockchains. One area that really shines is digital rights management and proper distribution of funds for content producers. KODAKCoin actually deals with both of those very nicely.” – states Shidan Gouran, President & COO of Global Blockchain Technologies Corp. (CSE: BLOC) in an interview with InvestorIntel’s Kelly Bird.

Kelly Bird: Who is Global Blockchain? What do you do?

Shidan Gouran: We are an investment company. We invest in cryptocurrencies. We invest in best-of-breed companies in the blockchain space and we incubate our own ventures and projects.

Kelly Bird: I know you also have a mining division part of your company. Can you tell me a little bit more about that and how works?

Shidan Gouran: Yes. We have invested heavily in the mining space. We are one of the largest mining operations now with our recent announcements in the space. We are spinning that into its own company. Right now if you buy Global Blockchain stock you are actually going to get one to one shares in the mining company. It is a big win for us I think.

Kelly Bird: Can you tell me, your software, your mining software, I think is really interesting. Can you just tell me a little bit more about it and how it works?

Shidan Gouran: Yes. Our mining division is not going to be your typical blockchain mining company. We really, as I mentioned to you last time, we really want to have an edge

over people as the two chip vendors do. Part of that is by creating a very distributive system where mining is actually auxiliary to other functionalities. For example, heating a home, you could use a miner for that. That is an area we are looking at. All kinds of devices and . . .to access the complete interview, [click here](#)
