

Kirill Klip on TNR Gold's shotgun gold project in Alaska

written by InvestorNews | March 21, 2019

Recently during [PDAC 2019](#), Kirill Klip, President and CEO of [TNR Gold Corp.](#) (TSXV: TNR), shared update on TNR Gold's Shotgun Gold Project in Alaska with InvestorIntel's Peter Clausi.

Kirill said: "We developed inferred resource of just under 800,000 ounces of gold. The cutoff grade is 0.5 grams per ton, but we are very excited because we have intersections as good as over 20 meters over 2.5 grams per ton. The most exciting of course are intersections over 200 meters over 1 gram per ton. So we are talking about very big, potentially porphyry system very similar in geological signature to Donlin Gold."

TNR Gold Corp. is working to become the green energy metals royalty company. Over the past twenty-three years, TNR, through its lead generator business model, has been successful in generating high-quality exploration projects around the globe. With the Company's expertise, resources and industry network, it identified the potential of the Los Azules copper project in Argentina and now holds a 0.36% NSR royalty on the entire project, which is being developed by McEwen Mining Inc.
