About Hallgarten & Company

Hallgarten & Company was founded in 2003 by the former partners of a well-known economic think-tank. Their output encompasses top-down and bottom-up research from a Classical Economic (Austrian School) perspective. Over the years, the team has successfully picked trends using macroeconomic underpinnings to guide investors through the treacherous waters of the markets. It was only natural, in light of the focus of Classical Economics upon the “real value” of monetary assets that the firm’s strengths should ultimately have become evident in resources sectors and projections of commodity trends.

Hallgarten & Company has advised and managed portfolios of offshore and onshore hedge funds.

Hallgarten also provides consultancy services on Latin American economic, politics and corporate matters including the production of bespoke research.

Hallgarten research is now available on Bloomberg and FactSet.
