

Matamec CEO on Developing one of North America's Most Advanced Rare Earths Projects

In a recent presentation at InvestorIntel's 6th Annual Technology Metals Summit, André Gauthier, President, CEO and Director of Matamec Explorations Inc. (TSXV: MAT | OTCQB: MHREF) delivered a presentation titled "Matamec Explorations – Developing one of North America's Most Advanced Rare Earths Projects and Exploring for Technology Metals in Quebec". Addressing industry and investors alike, Andre provides an overview of Matamec's two-company strategy. Matamec will split their energy-related element properties (notably, lithium, cobalt, and rare earths) into Matamec Energy, and their gold properties into Matamec Gold. Andre also details the mineral compositions of four of their energy properties: Tansim, Fabre, Vulcain, and Kipawa... to access the complete interview, [click here](#)
