

Predictiv AI – Using Artificial Intelligence to Solve “Real World” Problems

written by InvestorNews | April 15, 2021

Predictiv AI's ThermalPass Part of a Back-to-Work Strategy

The U.S. Centers for Disease Control and Prevention (CDC) reported on Wednesday that approximately 123.9 million people in the U.S. have received at least one dose of a COVID-19 vaccine, representing about 37.3% of the total population.

While vaccination rates are increasing and new COVID-19 cases begin to decline, corporations are developing return-to-the-office strategies that address employees' safety expectations that include regular health and temperature checks.

Temperature Checks Part of the New Workplace Health & Safety Protocols

In order to avoid admitting employees with symptoms, buildings are employing screening measures including restricting entry to a single access point to facilitate temperature checks.

To reduce lineups and wait times, buildings are implementing fast methods of [fever detection](#), and ThermalPass by [Predictiv AI Inc.](#) (TSXV: PAI) is one solution.

ThermalPass Fever Detection System

Last year, Predictiv AI [launched ThermalPass](#), a fever-detection system that instantly screens for higher than normal body

temperatures that could be caused by a virus, such as COVID-19, in order to reduce the risk of spreading the contagion.

The ThermalPass stand-alone unit enhances public safety by providing fast, touch-free scanning of people at entranceways of high-traffic, public locations, and its waterproof design allows for both indoor and outdoor uses.

By integrating 24 medical-grade, non-invasive thermal sensors onto a metal frame, and taking 1200 readings per second, each unit can process one person per second and is perfect for mass screening applications at high-traffic locations such as airports, hospitals, office buildings, and sports stadiums.

Growing Sales and Resellers

This week, Predictiv AI reported that it [signed F2 Factor](#) to provide strategic support services to increase sales and distribution of ThermalPass.

This announcement follows a slew of partnerships signed earlier this year with other resellers including TFG Concepts (TFG), MCL Sustainable Cleaning Solutions (MCL), and Security Identification Systems Corp. (SISCO).

- [TFG](#) is a sales agency with more than 30 years of experience representing manufactures and brands and has partnered before with companies such as Canadian Tire, Costco, Home Depot, and Lowes.
- [MCL](#) plans to focus on the Education, Food Service, and Government sectors across Canada and has almost four decades of experience as a master distributor and their customers include Air Canada, the City of Toronto, and Sunnybrook Hospital.
- [SISCO](#) will integrate ThermalPass with its Fast-Pass® Visitor Management System to help with track-and-trace

efforts for building occupants and visitors.

Last week, Predictiv AI [announced](#) that it has installed multiple ThermalPass temperature scanning devices in Memorial Healthcare System hospital facilities in Broward County, Florida.

Memorial Healthcare is a provider of healthcare services in south Florida through a six-hospital network and various ancillary facilities. By integrating ThermalPass, it has helped eliminate forehead temperature checks and captures core employees' temperature in a more efficient manner.

Dawn de la Vega, Director of Nursing at Memorial Regional Hospital, stated, "With COVID-19 still threatening our community, it's important for us to continue using technology in a way that will help us maximize our team's time and provide quality and safe care to our community."

Predictiv AI – Using Artificial Intelligence to Solve “Real World” Problems

Predictiv AI is not a 1-product company but an innovator and strategic operator of emerging technology companies with a focus on artificial intelligence (AI), blockchain solutions, and the Internet-of-Things. The Company's R&D division, AI Labs Inc. (AI Labs), develops new products that solve real-world problems.

In March, Predictiv AI [announced](#) that it partnered with the Waterloo Artificial Intelligence Institute (Waterloo.AI) at the University of Waterloo to allow AI Labs to pursue its AI reach and commercialization efforts and leverage Waterloo.AI as an

extension of the Predictiv AI team.

Harold Godwin, Managing Director of Waterloo.AI, stated, “We are thrilled to have Predictiv AI join as a partner with Waterloo, this is a very exciting time for our university and Waterloo.AI, and we are grateful for the interest and ongoing support of our partners, including our newest, Predictiv AI.”

The collaboration will allow AI Labs to access the artificial intelligence resources at Waterloo.AI, increasing the bandwidth in ideation, research, and development of solutions for real-world problems.

Final Thoughts

Predictiv AI helps businesses and organizations make smarter decisions using AI, deep machine learning, and data science.

As AI continues to be a disruptive technology, investors are looking for ways to profit from it and Predictiv AI could be an avenue for an AI investment.

With a market capitalization of less than C\$11 million, there is still plenty of upside to this Canadian high-tech company.

Innovative products Alertfleet	Predictiv ThermalPass hit	AI and the
---	--	---------------------------

commercialization phase

written by InvestorNews | April 15, 2021

Imagine if you could predict the future. The implications are enormous across so many areas from finance, technology, health, security, environment etc. Well now there is a way of predicting events by using Artificial Intelligence (AI) and big data analysis. Today's company offers AI solutions such as mass thermal screening tests to help fight against COVID-19 and AI software to predict/forecast the weather up to 72-hours in advance to help with safety and economics of fleets.

[Predictiv AI Inc.](#) (TSXV: PAI) ('Predictiv') is a cutting edge technology company which helps businesses and organizations make smarter decisions using advanced AI, deep machine learning, and data science techniques.

Predictiv's main initial focus is on commercializing their technology across 'smart cities' in areas such as public safety, energy management, smart buildings, mobility, technology, infrastructure, and healthcare sectors.

Predictiv state that the AI potential of the above areas of the smart cities market is potentially worth as much as [US\\$1.56 trillion by 2025](#). Of course if you can predict future outcomes using AI then the world is your oyster. As investors of the stock market know automated 'quant' or algorithmic trading is rapidly growing in popularity and could be worth as much as [US\\$18.8 billion pa](#) in revenues by 2024. AI is already succeeding in the stock market and perhaps soon in the lucrative robotaxi/autonomous vehicle market (aka Tesla (NASDAQ: TSLA)).

Predictiv's two wholly-owned subsidiaries focus on the public safety opportunity

AI Labs Inc.

AI Labs is the research and development business arm of Predictiv. AI Labs designed, engineered and developed ThermalPass™, a fever detection system approved by Health Canada, to mitigate the spread of contagions in public places.

AI Labs plans to commercialize ThermalPass™ under SMRT Labs Inc., offering two offerings, the ThermalPass Portable (US \$6,900) and ThermalPass Pro (US \$7,300). As of Jan. 5, 2021 Predictiv [reports](#) that they have received orders for 62 units of ThermalPass following the commercial launch in mid-October 2020, including initial orders from hospitals, long-term care facilities and prisons in Canada, as well as hospitals and public schools in the US.

A recent [commercialization deal](#) was made with TFG Concepts to represent ThermalPass to its clients across Canada.

Predictiv's subsidiary AI Labs owned ThermalPass™ for mass public temperature screening – Highly useful in the fight against COVID-19

Weather Telematics Inc.

Weather Telematics Inc. provides ground truth weather. Through its' patented AI and sensor technology, the Company is able to provide up to 72-hours advance proprietary predictive weather data to sectors including government, insurance, agriculture, public safety and fleet management.

Weather Telematics has developed 'Alert Fleet', a cost-saving software/sensor system that provides fleet owners with the tools

they need to run significantly safer and more efficient fleets.

Weather Telematics has formed a new strategic channel partnership with inField Solutions Inc. to commercialize Alert Fleet. Weather Telematics has already secured a multi-year agreement with Synoptic Data PBC for data provision services. The Company [state](#) that “this licensing contract will generate seven-figure revenue over the term for Weather Telematics and will launch its next generation of weather and road temperature sensors, which turns vehicles into their own mobile weather stations.”

Predictiv’s subsidiary Weather Telematics Inc. owned Alert Fleet with weather alerts etc for fleet safety and economics

Source: [Company presentation](#)

Michael Lende, President and CEO of Predictiv AI, recently [stated](#):

“Our goals for 2021 are to continue to extend and strengthen our innovative product portfolio, to ramp up sales of ThermalPass and AlertFleet, both internally as well as through strategic channel partners, and to continue targeting whitespace categories and verticals which we view as innately scalable. In 2021, our focus remains on building the business by increasing revenue and driving shareholder value.”

Closing remarks

Generally speaking the best time to jump on board with promising companies is not too early in the invention phase, but rather at the beginning of the commercialization phase, just as revenues are about to hopefully take-off. This is the stage that Predictiv AI is now entering and they have already had some good

early success.

Predictiv AI trades on a market cap of only C\$13.2 million, therefore it is potentially still very early days for the Company.

I wonder what Predictiv AI's software forecasts for their stock price in 2021? It certainly looks like it should be an excellent year ahead for Predictiv AI.

Michael Lende on the rising demand for Predictiv AI's touchless and non-invasive ThermalPass fever detection system

written by InvestorNews | April 15, 2021

InvestorIntel's Peter Clausi speaks with Michael Lende, President and CEO of [Predictiv AI Inc.](#) (TSXV: PAI), about the increasing demand for Predictiv AI's ThermalPass fever detection system.

In this interview Peter asks Michael about their recent news release where they confirm orders for another 34 units, taking their total sold to 62 since its commercial launch barely eight weeks ago. "Back in April it was nothing, but a discussion – we didn't have any tangible product called ThermalPass."

Michael explains how ThermalPass has gone from concept to revenue in less than nine months, and when asked about competitive advantages, explains that **“It is all about quality and scalability and we have both going for us.”** Adding how each ThermalPass does not use cameras, which ensures individuals privacy and anonymity, he continues “We collect data without encroaching on a person’s privacy.” He notes that the “United States is discontinuing use of Chinese camera-based detection by August 2021.”

The ThermalPass is a touchless fever detection system that uses non-invasive technology that can take 1200 readings per second and may process as many as 60 people per minute. Approved by Health Canada as a class 1 medical device unit, the ThermalPass has 24 medical-grade thermal sensors and **enhances public safety by providing fast, touch-free scanning of people at entranceways of high-traffic, public locations to reduce the risk of spreading COVID-19 and other fever-bearing contagions.** “Once COVID goes we want to have something that is sustainable for fever detection and other contagions,” Michael said.

Michael Lende on a Health

Canada approved touchless fever detection system that can help identify potential at-risk carriers

written by InvestorNews | April 15, 2021

Peter Clausi with Predictiv AI CEO Michael Lende on the touchless ThermalPass Fever Detection System

In a recent InvestorIntel interview Peter Clausi speaks with Michael Lende, President and CEO of [Predictiv AI Inc.](#) (TSXV: PAI), about their ThermalPass Fever Detection System. Michael said that ThermalPass is a Health Canada approved touchless fever detection system that can help identify potential at-risk carriers.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Michael went on to say that camera-based sensors have privacy issues but Predictiv AI's ThermalPass Fever Detection System uses thermal medical grade sensors which are nonintrusive and preserves anonymity of the people passing through. "It can scan 60 people per minute." He added. "There are 24 medical grade sensors in the ThermalPass, each taking 100 readings per second. It is quite accurate as you are going through." About Predictiv AI:

Predictiv AI Inc. is a technology company which helps businesses and organizations make smarter decisions using advanced artificial intelligence, deep machine learning and data science

techniques. Its Weather Telematics Inc. subsidiary uses patented air quality monitoring sensors to provide predictive weather risk information to the insurance, logistics, fleet management and public safety sectors. The Company's R&D division, AI Labs Inc., develops new products that solve real-world business problems. The joint venture with Commersive Solutions Corp. is developing innovative technologies for use in various public spaces, starting with the ThermalPass™ fever detection system.
