

Thunderstruck copper assets 'ready to go now' with JV partner

"In the last few months we have got our permitting in place, compensation agreements with the chiefs of every [Fiji] village, license renewals...we are ready to go now with joint venture partners." – states Bryce Bradley CEO, President and Co-founding Director of Thunderstruck Resources Ltd. (TSXV: AWE) in an interview with InvestorIntel's Jeff Wareham.

Jeff Wareham: Of all the places that I talk to about mining, Fiji is one of the most interesting ones. How is it as a jurisdiction to work in?

Bryce Bradley: Surprisingly a lot of people did not know about Fiji as a mining jurisdiction, but it has been mining for over 75 years. There is a gold mine to the north of us on the main island. There is another one, Lion One Metals, which is going into development right now. It has its development permit. It is a gold development play. There is a big copper porphyry owned by Newcrest right to the right of us at 20 kilometers. It is very mining friendly right from grassroots right through to production.

Jeff Wareham: When should investors be looking for more news?

Bryce Bradley: We will be getting a lot of news. We are going to be putting out a press release next week on results from our exploration program on our gold asset, Liwa Creek, that will come out next week. The following week we will be putting out results on Rama Creek, our copper porphyry. In the meantime, we are actually getting, it cannot be called a resource estimate, but it is a back-of-the envelope grade and tonnage estimate on our zinc-copper assets for potential joint venture partners...to access the complete interview, [click here](#)

Lundin on being 'Thunderstruck' with copper, zinc and gold

Brien Lundin, co-founder and Chairman of the board of Thunderstruck Resources Ltd. (TSXV: AWE) ("Thunderstruck") in an interview with InvestorIntel Senior Editor, Jeff Wareham discuss Thunderstruck's "two proven zinc and copper rediscoveries", in Fiji. Brien states that Thunderstruck also has "high grade gold targets" on their property, that they are going to drill using the money Thunderstruck has just raised. Brien also explains why investors should invest in mining projects in Fiji and what investors should expect to hear next from Thunderstruck.

Jeff Wareham: Brien, in a market where not much has happened over the summer you guys have just closed off a \$750,000.00 financing. Tell me what it is going to take to get people excited about Thunderstruck Resources.

Brien Lundin: We are excited because we have two proven zinc-copper discoveries, high grade discoveries out of Lane. They are unexplored for about 40 years. They were discovered by Anglo. We also have gold, high grade gold targets that we are going to drill right now with the money that we just raised.

Jeff Wareham: Excellent. Now you are in Fiji. Is Fiji a place that I should be investing?

Brien Lundin: It is a great place. People do not realize it has a long mining history, some long established for literally decades, mines that have been running in Fiji. It is a paradise, of course, but the mining goes more inland. It is a great place to operate. Rule of law and everything you need...to access the complete interview, [click here](#)
