

Troilus Gold's Rise: Unveiling One of North America's Premier Undeveloped Gold-Copper Resources

written by InvestorNews | November 1, 2023

Wars, inflation, possible recessions, and a volatile world are all factors in 2023 that are helping to support the price of gold. Looking at the chart below gold continues to perform well over a long period of time.

Justin Reid of Troilus Gold Discusses New High-Grade Drill Results and the Troilus Mine Restart

written by InvestorNews | November 1, 2023

In this InvestorIntel interview, Tracy Weslosky talks with [Troilus Gold Corp.](#)'s (TSX: TLG | OTCQX: CHXMF) CEO and Director Justin Reid about the recent [drill results](#) from Zone X22 at their past-producing Troilus Project in Quebec, Canada. Located in one of the most prolific gold belts in the world, Justin explains how the near-surface, high-grade gold mineralization at Zone X22 enhances the economics of the project.

Recent drilling results highlight the new X22 Zone, extending over 1.2 kilometers, and exhibiting higher-grade mineralization compared to the rest of the deposit. Justin comments that the X22 Zone offers the advantage of being shallow, resulting in a lower strip ratio, and the potential for enhanced economics in a Feasibility Study that is expected later this year.

Justin adds that the recent 7,800-meter drilling program builds upon the 300,000 meters they have already completed at the Troilus Project.

Providing an update on the systematic advancements to restart production at the Troilus Project, Justin discusses the potential for a robust gold market this year.

About Troilus Gold Corp.

Troilus Gold Corp. is a Canadian-based junior mining company focused on the systematic advancement and de-risking of the former gold and copper Troilus Mine towards production. From 1996 to 2010, the Troilus Mine produced more than 2 million ounces of gold and nearly 70,000 tonnes of copper. Troilus is located in the top-rated mining jurisdiction of Quebec, Canada, where it holds a land position of 435 km² within the prospective Frôtet-Evans Greenstone Belt. Since acquiring the project in 2017, ongoing exploration success has demonstrated the tremendous scale potential of the gold system on the property with significant mineral resource growth. The Company is advancing engineering studies following the completion of a robust PEA in 2020, which demonstrated the potential for the Troilus project to become a top-ranked gold and copper producing

asset in Canada. Led by an experienced team with a track record of successful mine development, Troilus is positioned to become a cornerstone project in North America.

Justin Reid on how recent assay results will provide a ‘huge impact’ on Troilus Gold economics

written by InvestorNews | November 1, 2023

In this InvestorIntel interview, host Tracy Weslosky talks to [Troilus Gold Corp.](#)’s (TSX: TLG | OTCQX: CHXMF) CEO and Director Justin Reid about their recent [assay results](#) which are among the “thickest and most continuous high grades” of gold mineralization identified at the Troilus Project in Quebec to date.

Justin starts, “Over the last four years we’ve drilled 250,000 meters and we’ve had lots of great results. We have identified over 8 million ounces of gold and growing, but these results are different.” He goes on to say that the significantly higher grades identified at the new zone are expected to have a huge impact on the economics of the Troilus Project, thus making “a good deposit potentially great.” Driven by the recent positive developments at the Project, Justin explains why the management

decided to focus its engineering efforts towards a feasibility study rather than the previously anticipated pre-feasibility study plan of action.

Justin Reid on increasing the Troilus Gold resource by 6.5M ounces over the last 2 years

written by InvestorNews | November 1, 2023

In a recent InvestorIntel interview, Peter Clausi speaks with Justin Reid, CEO and Director of [Troilus Gold Corp.](#) (TSX: TLG | OTCQB: CHXMF) about the new assay results from the Fall/Winter 2020 drill program. Highlighting the addition of 6.5 million ounces to the Troilus resource in less than 2 years, Justin walks Peter through their [record growth last year](#) and shares how Troilus has secured and “unheard of” volume of institutional investors (51).

About Troilus Gold Corp.

Troilus is a Toronto-based, Quebec focused, advanced stage exploration and early-development company focused on the mineral expansion and potential mine re-start of the former gold and copper Troilus mine. The 107,326 hectare Troilus property is located northeast of Chibougamau, within the Frotêt-Evans Greenstone Belt in Quebec, Canada. From 1996 to 2010, Inmet Mining Corporation operated the Troilus project as an open pit mine, producing more than 2,000,000 ounces of gold and nearly 70,000 tonnes of copper.
