

# Toronto's venture exchange attracting cleantech listings

✘ Orlee Wertheim, Business Development executive at TMX Group, presented at the 5th Annual Cleantech and Technology Metals Summit, held recently in Toronto.

*TMX Group operates the Toronto Stock Exchange, Canada's largest equity market, and TSX Venture Exchange. TSX Venture was Number 1 in the world last year for raising equity for mining companies.*

*There are more than 1,300 mining companies listed in Toronto – but the new growth area is in the listing of cleantech companies: there are now 112 such companies listed.*

In her presentation video, Orlee Wertheim:

- Shows how important Toronto is for raising equity capital, coming third in the world ahead of both Australia and London.
- Details the size of the mining sector on the TSX Venture, and the growth in foreign companies listing there.
- Explains the importance of the Toronto exchange for investors in the U.S. and Europe seeking exposure to the mining space.
- Outlines how the TSX and TSX.V are working to attract more companies, including by reduction in fees.
