

# John Cash on Ur-Energy's uranium inventory, patented technology and Q3 results

written by InvestorNews | December 28, 2022

In this InvestorIntel interview, Tracy Weslosky has [Ur-Energy Inc.](#)'s (NYSE American: URG | TSX: URE) CEO, Chairman, and President John Cash discuss about Ur-Energy's 2022 [Q3 Results](#). With a strong cash position and 324,000 pounds of ready-to-sell inventory, John discusses how Ur-Energy is positioned to ramp up uranium production as they continue to bring in additional sales contracts.

Providing an update on the successful [Phase 1 field testing](#) on Ur-Energy's patented injection well casing and installation technology, John explains how the technology results in significant reduction in drill rig time, emissions and cost. He goes on to provide an update on the promotion of Steve Hatten to Chief Operating Officer. Having been involved in uranium production for over 30 years, John says that Steve is "well known throughout the industry and brings tremendous expertise to Ur-Energy."

## About Ur-Energy Inc.

Ur-Energy is a uranium mining company operating the Lost Creek *in-situ* recovery uranium facility in south-central Wyoming. We have produced, packaged, and shipped approximately

2.6 million pounds  $U_3O_8$  from Lost Creek since the commencement of operations. Ur-Energy has all major permits and authorizations to begin construction at Shirley Basin, the Company's second *in situ* recovery uranium facility in Wyoming and is in the process of obtaining remaining amendments to Lost Creek authorizations for expansion of Lost Creek. Ur-Energy is engaged in uranium recovery and processing activities, including the acquisition, exploration, development, and operation of uranium mineral properties in the United States. The primary trading market for Ur-Energy's common shares is on the NYSE American under the symbol "URG." Ur-Energy's common shares also trade on the Toronto Stock Exchange under the symbol "URE." Ur-Energy's corporate office is in Littleton, Colorado and its registered office is in Ottawa, Ontario.

## **John Cash of Ur-Energy talks about renewed support for uranium producers and nuclear energy**

written by InvestorNews | December 28, 2022

In this InvestorIntel interview host Jack Lifton talks to [Ur-Energy Inc.](https://www.investorintel.com/ur-energy)'s (NYSE American: URG | TSX: URE) Chairman, CEO & President John Cash about the recent positive news for uranium

producers and the coming renaissance of nuclear energy.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here to access InvestorChannel.com](https://www.investorintel.com)), John tells Jack that “so much good news has come out in the last just two or three weeks,” starting with the Inflation Reduction Act, which includes “a number of provisions within that act that really provide a lot of support for our existing reactors in the U.S. and also new builds going forward.” John goes on to say that “everyone was assuming that a number of reactors in the U.S. would be shutting down over the next 20 years, but I don’t think that’s the case anymore,” and “that means that they’ll be buying more uranium. There will be more demand on the front end of the fuel cycle and throughout the fuel cycle to keep those reactors up and running.”

John also talks about the increasing reliance on nuclear fuel as a green, carbon neutral source of energy, with reactors being restarted and new builds underway, including China’s ongoing build program of 150 new reactors. He also talks about the future of small modular reactors, with the expectation in the industry that as many as 300 new small modular reactors will be built by 2050 to meet domestic energy needs. John tells Jack that this renewed interest in nuclear energy will substantially increase demand for uranium, particularly from producers in stable, friendly jurisdictions.

## **John Cash of Ur-Energy discusses the growth in price and demand for uranium as an ESG power source**

written by InvestorNews | December 28, 2022

In this InvestorIntel interview with host Tracy Weslosky, [Ur-Energy Inc.](https://www.ur-energy.com)'s (NYSE American: URG | TSX: URE) CEO John Cash

talks about the ongoing uranium bull market in spite of near-term geopolitical volatility.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), John discusses the expectation of tremendous growth in the uranium industry as Europe and Asia move to a greater reliance on nuclear energy for domestic and carbon-free power needs. At present, John points out in the interview, the USA receives about 50% of its uranium from Russia and its satellite countries, which has so far not been affected by sanctions, but may see increased pressure to limit its importation. As arguably the only pure uranium play in the United States, he talks about how Ur-Energy is well positioned to feed domestic supply needs.

# John Cash of Ur-Energy talks about site construction and uranium as a key carbon-free fuel

written by InvestorNews | December 28, 2022

In this InvestorIntel interview with host Tracy Weslosky, [Ur-Energy Inc.](#)'s (NYSE American: URG | TSX: URE) CEO John Cash talks about the rapid progress being made at its Lost Creek uranium project and the importance of uranium as a carbon-free fuel.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), John talks about the rapid construction program underway at Ur-Energy's Lost Creek made possible by the Company having pre-ordered and purchased well installation and other materials for additional header houses, as well as plans for building its own local manufacturing site and laboratory. John also discusses testing innovative techniques that could significantly reduce drill rig time for injection wells, along with reducing associated costs and environmental impacts.

John also talks about uranium being an important part of the carbon free story going forward, and how “we believe we are truly at the tip of the spear with regard to that because we sell it to U.S. utilities and it produces carbon free energy,” greatly reducing the emission of greenhouse gases.

# Jack Lifton, Byron W. King and Ur-Energy's John Cash explore the future direction of the American uranium industry

written by InvestorNews | December 28, 2022

In this episode of **Critical Minerals Corner**, Jack Lifton and Critical Minerals Corner Co-Host & InvestorIntel Columnist Byron W. King speak with John Cash, CEO of [Ur-Energy Inc.](#) (NYSE American: URG | TSX: URE).

John explains that Ur-Energy is today producing yellowcake, the commercial form of uranium, by the environmentally friendly method of "in-situ" mining, which he explains. Ur-Energy then processes the mine output to commercial yellowcake.

John rounds out the discussion by defining the size of the American domestic market for uranium. He tells us where and in what form uranium for domestic American civilian use originates; what parts of the domestic American uranium supply chain are deficient; and whether or not America can ever have a secure domestic supply of uranium for its largest in the world civilian nuclear electricity generation industry.

This is a must-see video for all of those interested in green energy self-sufficiency for America.

## **Ur-Energy's Jeff Klenda on Biden's interest in nuclear energy, US utilities 'just-in-**

# time deliveries' for uranium and being the lowest cost producer of uranium in the U.S.

written by InvestorNews | December 28, 2022

In a recent InvestorIntel interview, Peter Clausi spoke with Jeff Klenda, Chairman, President, and CEO of [Ur-Energy Inc.](#) (NYSE American: URG | TSX: URE) about the positive impact of Biden's administration on the ongoing prioritization of nuclear energy. Discussing the tenuous issues around America's dependence on imports for their supply of uranium, Jeff explains how Ur-Energy is capable of ramping up production faster than anybody else in the United States.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Jeff went on to say that the US imports more than 95% of its uranium requirement with 20% coming from Russia. He highlighted that the US utilities are heavily reliant on just-in-time deliveries for uranium. "If we were to see any type of disruption in the flow of material that is coming into the United States from foreign sources. Our US utilities would be in crisis literally overnight." Highlighting that: "We are the lowest cost producer of uranium outside of Kazakhstan. Nobody in the US can produce at a lower cost than we can."
