

# Moovly Converts PowerPoint to Video at the Speed of a Mouse Click

It's a fact – video's momentum remains strong in 2020 with over 90% of marketers saying it is an important part of their strategy and now, over 80% of the internet traffic is video.

More importantly for marketers, studies show that viewers retain over 90% of a message when they watch it in a video compared to less than 20% when reading it in text, video remains a key tool for marketing messages and content distribution.

So with mountains of PowerPoint presentations sitting on digital drives with valuable content hidden away, imagine if you could point, click and have your content reborn as video?

On October 22, Moovly Media Inc. (TSXV: MVY) announced the addition of a new PowerPoint conversion wizard to its popular video creation and distribution tool, available free to try at [moovly.com](https://moovly.com).

Moovly is an online video creation tool that is as simple to use as PowerPoint. You do not need to be a professional video editor to create videos in Moovly. Its drag-and-drop interface is easy to use and it is cloud-based so there is no software to install on your computer or tablet.

## Repurposing Older Digital Assets

Previously, repurposing older digital assets into video required the use of a video editor and hours of time. Moovly's new PowerPoint import tool has made it easier to upload and automate the conversion of PowerPoint presentations into new engaging video content.

Moovly CTO Geert Coppens commented, “Moovly’s ability to easily convert PowerPoints to video is a major leap forward and particularly important for our growing number of education and corporate clients, who need to create or migrate their many PowerPoint-based courses or presentations to a new, more engaging video format without the cost and hassle of recreating them from scratch in video format.”

Moovly’s new “Import PowerPoint” wizard uploads an existing PowerPoint presentation and converts it into a Moovly project video with every slide turned into a separate video clip. Once imported, the video can be edited and enhanced from Moovly’s content library that contains millions of images, sounds, and video clips from partnerships with Getty Images and Storyblocks.

I imported my 14-slide corporate presentation and the Moovly wizard uploaded, analyzed, processed, and converted it into a video in less than 2 minutes.

### **Key Feature for Education and Corporate Clients**

The new feature should help Moovly as it continues to add education and corporate clients who want to easily migrate their PowerPoint presentations into marketing videos, courses or other online content.

Earlier this year, Moovly integrated its publishing feature with Facebook, Vimeo, and YouTube whereby users can publish their videos to those platforms with a single click of a button.

With the current COVID-19 pandemic affecting people’s abilities to congregate, more people are relying on video to communicate and this had led to an increase in the need for tools like Moovly to create and distribute content.

With more than 3 million users, including users from over 300 of the Fortune 500 companies, Moovly’s clients include Google,

Bloomberg, IBM, KPMG, Procter & Gamble, Disney, and Oracle.

## **Brendon Grunewald on Moovly's Google integration with G Suite**

“We have certainly seen growth as people work and learn from home and that has increased our user base and our subscription base as well. Increasingly we are seeing large corporations that froze their budgets at the start of corona are now looking to come back and still need to produce a lot of content. They need to get their economies and their companies back onto level, but they have restricted budgets and abilities. So, with the tools like ourselves they don't have to restrict the amount of content they create. They can produce even more content on a lower budget and hence achieve their stretched goals with less means.” States Brendon Grunewald, President, CEO and Director of Moovly Media Inc. (TSXV: MVY), in an interview with InvestorIntel's Tracy Weslosky.

Brendon went on to provide an update on Moovly's Google integration with G Suite, which now allows for Moovly-created content to be uploaded both seamlessly and faster. He said that users can now move contents from Google Drive directly to Moovly and after they have edited the video they can publish the content on YouTube with the single click of a button. Brendon continued, “We pride ourselves in building what we believe to be the best product and that is obviously being validated by a number of customers out there.”

## **Moovly's Brendon Grunewald on the video media revolution in the home office**

“The COVID-19 pandemic has changed the way people work, learn, and the way they communicate. The physical meetings have just evaporated. We need tools that we can communicate effectively with and video is a great way to communicate. If a picture is worth a thousand words, then a video is worth a million.” States Brendon Grunewald, President, CEO and Director of Moovly Media Inc. (TSXV: MVY), in an interview with InvestorIntel's Tracy Weslosky.

Brendon went on to say that there is an increased awareness among people and companies, both big and small, about Moovly Media. He added that even existing customers are extending their contracts which means that Moovly is delivering great value to its customers.

Brendon also spoke on the competitive advantages of Moovly Media over its competitors. He said, “We democratize the access or ability to make really high-end quality content. We strive to always to make it very simple to use but at the same time offer a wide variety of different solutions. If you are someone who just wants to make a quick social media video you can do that within seconds using our templates. If you are an experienced videographer then you can use some of our advanced

features like green screening and screen recordings. We have also got automated subtitling. That brings me to the second USP which I would say is our automator. Increasingly we are seeing companies want to make vast volume of content using programs or spreadsheets where they import data and mass personalize and customize videos. Thirdly we have an exceptionally good price offering which makes us very competitive in the market in terms of value for money.”
