

Wealth Minerals President on hitting the lithium market full force

June 6, 2018 – “Every single brine asset in the world is visible from outer space. Everyone knows where they are. You are competing with everyone. There is no way you have a competitive advantage in terms of finding these things because everyone knows where they are. Your competitive advantage is in understanding the paradigm shift that is happening in the world first, picking a jurisdiction where you have competitive advantage and then basically hitting it with full force.” states Tim McCutcheon, President of Wealth Minerals Ltd. (TSXV: WML | OTCQX: WMLLF), in a recent presentation at the 7th Annual InvestorIntel Summit – Buds, Batteries & Blockchain 2018.

Tim McCutcheon: We will go through obviously the disclaimers and forward looking statements. The key thing about Wealth Minerals and, again, I think in the interest of time in having it be a little more focused, I have a tendency to skip around a little bit so please forgive me on that, but the idea really is to give you an understanding of what Wealth Minerals is and where we are going. The company has been around for a while obviously, but its current form in terms of being involved in the lithium space, started about 2 years ago. Market cap, anywhere between \$150 and \$170 million dollars. As I am sure you are probably aware that the volatility in the lithium market right now is quite high, lithium equity market, so things are moving all over the place. In general we are well north of a \$100 million dollar market cap, which means that we are already getting interest from institutional investors and, sort of, out of the retail space and now into the institutional space. Four lithium projects, all of them in Chile. I think the key thing that we like to present about

ourselves is, Chile as jurisdiction is a great place to be. It is a mining friendly place. It has a proven track record of over decades of being fair to investors, being stable, both on a macro level, on a fiscal level. It is not a country you go to wake up the next morning and find something horrible happened in newspapers. It is a fairly predictable place. As far as our team goes we have an unparalleled ability to operate within Chile in part because of the track record of the team. Our country manager is Marcelo Awad. He was the CEO at Antofagasta, one of the world's largest copper mining companies and he was an Executive Vice President at Codelco, which is a state mining company for Chile, obviously a major player in that country. There are a bunch of other reasons as well, but, again skipping on. As a timeline, as we just spoke about, about 2 years ago the company got started in the lithium space. Our basic idea was to put together a platform. That platform was put together in the beginning of 2016. Use that platform to acquire assets. Again, what I mentioned in the panel a little bit earlier, the lithium space, at least in where we are focused, which is South America a triangle for salars, brine assets. Every single brine asset in the world is visible from outer space. Everyone knows where they are. You are competing with everyone. There is no way you have a competitive advantage in terms of finding these things because everyone knows where they are. Your competitive advantage is in understanding the paradigm shift that is happening in the world first, picking a jurisdiction where you have competitive advantage and then basically hitting it with full force...to access the complete presentation, [click here](#)

CEO of Wealth Minerals presents “Lithium for Growth” at #CTMS2017

In a recent presentation at **InvestorIntel’s** 6th Annual Cleantech & Technology Metals Summit (#CTMS2017), Tim McCutcheon, President of Wealth Minerals Ltd. (TSXV: WML) delivered a presentation titled, “Lithium for Growth”. Addressing industry and investors alike, Tim provides an overview of four of their Chilean salar projects: Atacama Salar Project, Laguna Verde Project, Trinity Project, and Five Salars Project. Tim highlights the potential of the Atacama Salar as it represents one third of global lithium production. Tim also discusses the advantages of having access to a local and experienced workforce by being based in Chile... to access the full presentation, [click here](#)

Wealth Minerals to present at InvestorIntel's 6th Annual Cleantech & Technology Metals Summit

Tim McCutcheon to present "Lithium for Growth"

May 8, 2017 – Wealth Minerals Ltd. (TSXV: WML), with world class lithium assets in a proven jurisdiction, is pleased to announce that they will be presenting at **InvestorIntel's 6th Annual Cleantech & Technology Metals Summit** (CTMS2017.com | @CTMS2017). Featuring some of the most impressive market movers in the cleantech and technology metals sector, #CTMS2017 is scheduled for Monday, May 15th and Tuesday, May 16th at the Omni King Edward Hotel in Toronto, Canada located at 37 King St. East.

Tim McCutcheon, President of Wealth Minerals Ltd. is scheduled to speak on Tuesday, May 16th from 1:35-1:50 PM (EST). Presenting **Lithium for Growth**. Wealth Minerals gives investors exposure to world class lithium assets in a proven jurisdiction for lithium production. They are advancing their 46,000 hectare position, the Atacama salar (the salar which accounts for approximately a third of global production at the

lowest cost), and they have positioned Wealth Minerals to be a key player in the ongoing consolidation of lithium assets throughout Chile. Lithium market dynamics and a rapidly increasing metal price are the result of profound structural issues with the industry meeting anticipated future demand. Wealth is positioning itself to be a major beneficiary of this future mismatch of supply and demand.

InvestorIntel Corp. CEO Tracy Weslosky commented: “It is with great pleasure that we announce the participation of Wealth Minerals Ltd. as a presenter at our 6th annual Cleantech & Technology Metals Summit. We have over 100 companies participating in what is intended to be the most exciting review of global equities focused on strategic materials, critical metals and the associated technologies that impact the world. Please note that Tim will also be a panelist on Monday, May 15th from 10:20-11:10 AM (EST) in a panel moderated by InvestorIntel Editor Christopher Ecclestone about the lithium exploration/M&A market. We look forward to our best #CTMS event to-date.”
