Greg Fenton of Zentek on Customer Demand for its Innovative Antimicrobial Coating for HVAC Systems

written by InvestorNews | May 17, 2023

In this InvestorIntel interview, Tracy Weslosky talks with Zentek Ltd.'s (NASDAQ: ZTEK | TSXV: ZEN) CEO and Director Greg Fenton about an update on the commercialization of Zentek's patented ZenGUARD™ antimicrobial technology.

With the ability to increase viral filtration efficiency of an HVAC (Heating, Ventilation, and Air Conditioning) filter by almost 5 times, Greg explains how a ZenGUARD™ coated HVAC filter is an incredibly safe way to improve indoor air quality and remove pathogens from the air without any additional energy requirements.

Although currently going through a regulatory approval process through Health Canada's Pest Management Regulatory Agency ("PMRA") in Canada, ZenGUARD™ has already received approval from another branch of Health Canada, indicating a high likelihood of approval from PMRA. Greg also discusses how ZenGUARD™ is seeing a growing demand from end users including filter manufacturers, provincial and municipal governments, and private sector customers.

About Zentek Ltd.

Zentek is a graphene technology company focused on the research, development, and commercialization of graphene-based novel products to give its commercial partners a competitive advantage by making their products better, safer, and greener.

Zentek's patented ZenGUARD™ coating is shown to have 99-per-cent anti-microbial activity and to significantly increase the bacterial and viral filtration efficiency of both surgical masks and HVAC systems. Zentek's ZenGUARD™ production facility is located in Guelph, Ont. Zentek's second technology is the patent-pending ZenARMOR™ platform focused on corrosion protection applications.
